Managing Value in Organisations 2016-05-13 the book gives a uniquely comprehensive philosophical analysis of nietzsche's thinking it shows how this thinking has its unifying focus on values both the past and prevailing values that his psychologies and genealogies explain and the new values that he himself creates and defends it maps in detail the argumentative structure of his thinking as it bears on this central topic it argues that his ultimate ambition is to show how we can incorporate the truth about values into our own valuing and that he is therefore more deeply committed to truth than often supposed the book's chapters examine twelve key concepts each at the heart of a network of problems and ideas a first group of concepts value life drives affects treat the bodily valuing he attributes to our drives and affects a second group human words nihilism freedom treat the valuing we carry out in our deeply flawed conception of ourselves as moral agents the third group the yes self creating dionysus project the values he offers as the lesson of his critiques values centered on a universal affirmation expressed in the idea of eternal return each chapter organizes the rich complexity of nietzsche's thought on its topic and works to resolve contradictions often by showing how he treats the concepts and problems as historical the book synthesizes these
