## ***Annals of Agriculture, and Other Useful Arts. ... 1784***

children have a natural curiosity about the world around them when it comes to the world of nature adults often can't help other than to say don't touch that don't play with that or don't eat that of course children will do all these things anyway therefore simply intriguingly informatively and i hope humorously this book tries to introduce young and old alike to the plants around us that are considered to be a nuisance worthless or potentially harmful the weeds as we find those plants that we don't want and annually spend millions of dollars trying to eradicate have served mankind for thousands of years and though we may not realize it continue to provide food medicine shelter clothing and pleasure to millions of people worldwide if seeing a bush or tree laden with fruit you ever wondered can you eat those or have seen a beautiful tiny wildflower and wished you knew its name this book will start you on a journey of discovery not to be missed starting right outside your door michael p earney texas 2015
