The National Skills Development Handbook 2010/11

2010

adult learning systems play a crucial role in helping people adapt to the changing world of work and develop relevant skills community education and training has been brought forward as a possible way to foster adult learning in south africa especially among disadvantaged groups south africa

NSC Review

1987

research for educational change presents ways in which educational research can fulfil its commitments to educational practice focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident the question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice in the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a south african mathematics classroom in the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices this book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice it will also appeal to teacher educators practitioners and undergraduate students interested in educational research

Getting Skills Right Community Education and Training in South Africa

2019-03-14

the 2011 transformation audit presents a collection of articles by south african thought leaders which asks how the country can set goals and achieve them in a hostile global climate that threatens developmental gains that have been painstakingly achieved for nearly two decades south africans have conducted exhaustive analyses of the country s challenges embarked on bold scenario exercises and more recently produced forward looking strategies aimed at addressing these challenges the most eminent of these in recent years were the department of economic development s new growth path and the national planning commission s draft national development plan we know now what the problems are and by and large what needs to change to address them courage is required now to forge consensus to take decisions on strategies and to start implementing them as in previous years this publication with its slightly different format and appearance seeks to provide analysis and provoke debate on how this might be achieved

Research for Educational Change

2016-06-17

the research reported in caught in the act draws together the insights gained from a continuous professional development initiative for high school mathematics teachers teaching in low socio economic status and socially challenged environments in south africa the chapters show the possibilities for enhancing achievement in school mathematics if a strength based approach is adopted to develop teaching with teachers and when their concerns are taken seriously the book demonstrates that the ecological relevance fitness for the context in which teachers are teaching of the goods developed and distributed by initiatives should be a major consideration to offer hope for sustainable implementation to improve school mathematics education the book is of interest to mathematics teachers school leaders mathematics curriculum

advisors policy makers and researchers

Transformation Audit 2011

2011

a 2021 spe outstanding book award winner studies of teacher leadership have proliferated over the past fifty years earlier work tended to focus exclusively on the link between teacher leadership and school improvement now however cross cultural research on the relationship between teacher leadership and power agency and school culture has the potential to contribute to a deeper understanding of the teaching profession in diverse geographical and social contexts a cross cultural consideration of teacher leaders narratives of power agency and school culture presents groundbreaking work that expands discussions of teachers work to highlight the struggles of a profession in three different countries england jamaica and the united states this research provides examples of teacher leaders narratives about power agency and school culture presenting the voices of teacher leaders across diverse contexts it identifies the lessons that transcend culture and speaks to the importance of understanding how teachers work and teacher leadership functions within complex school cultures this work has profound implications for teaching learning and leading in a 21st century global economy perfect for courses such as teacher leadership educational leadership and management teaching and teaching methods action research applied research

this book constitutes the refereed proceedings of the 4th international conference on innovative technologies and learning icitl 2021 held in november december 2021 due to covid 19 pandemic the conference was held virtually the 59 full papers presented together with 2 short papers were carefully reviewed and selected from 110 submissions the papers are organized in the following topical sections artificial intelligence in education augmented virtual and mixed reality in education computational

thinking in education design framework and model for innovative learning education practice issues and trends educational gamification and game based learning
 innovative technologies and pedagogies enhanced learning multimedia technology enhanced learning online course and based environment and science technology
 engineering arts and design and mathematics

A Cross-Cultural Consideration of Teacher Leaders' Narratives of Power, Agency and School Culture

2019-12-23

across the world stem learning and work in science technology engineering and mathematics has taken central importance in education and the economy in a way that
 few other disciplines have stem competence has become seen as key to higher productivity technological adaptation and research based innovation no area of
 educational provision has a greater current importance than the stem disciplines yet there is a surprising dearth of comprehensive and world wide information about stem
 policy participation programs and practice the age of stem is a state of the art survey of the global trends and major country initiatives in stem it gives an international
 overview of issues such as stem strategy and coordination curricula teaching and assessment women in stem indigenous students research training stem in the graduate
 labour markets stem breadth and stem depth the individual chapters give comparative international analysis as well as a global overview particularly focusing on the
 growing number of policies and practices in mobilising and developing talent in the stem fields the book will be of particular interest to anyone involved in educational
 policy those in education management and leaders in both schooling and tertiary education it will have a wider resonance among practitioners in the stem disciplines
 particularly at university level and for those interested in contemporary public policy

Innovative Technologies and Learning

OECD Reviews of Vocational Education and Training A Skills beyond School Review of South Africa

2014-11-18

South Africa has a long history of vocational education and training. The country's vocational education and training system is based on the principle of dualism, which means that students spend part of their time in school and part of their time in a workplace. This system is designed to provide students with the skills and knowledge they need to succeed in the workforce. However, the system has faced many challenges in recent years, including a decline in enrollment and a lack of funding. The OECD Review of Vocational Education and Training in South Africa provides a detailed analysis of the system and offers recommendations for how it can be improved.

this text analyses how technical colleges have responded to the emerging field of further education and training fet in south africa the data and theories presented are the result of research conducted by the human sciences research council including surveys of technical college graduates and employers on their satisfaction with college graduates and institutional profiles of local labor markets the international case studies of vocational and technical education demonstrate the interrelatedness of education

and training systems

Grain Boundaries in Engineering Materials

1975

The grain boundaries in engineering materials are the regions where the grains meet. They are important because they can affect the mechanical properties of the material. For example, grain boundaries can act as barriers to dislocation motion, which can increase the strength of the material. However, grain boundaries can also be sites for corrosion and other types of degradation. Therefore, understanding the role of grain boundaries is essential for designing materials that are both strong and durable.

South African national bibliography

1998

The South African national bibliography is a comprehensive list of all books published in South Africa. It is published annually by the South African Library. The bibliography is organized by subject and includes information about the author, title, and publisher of each book. It is a valuable resource for researchers and students alike.

FET Colleges

2007

FET Colleges are post-secondary institutions that provide training and education in a variety of fields. They are designed to prepare students for the workforce and to provide them with the skills and knowledge they need to succeed in their careers. FET Colleges are an important part of the education system and play a vital role in the development of the workforce.
