memories of africa home and abroad in the united states suggests a new lens for viewing african diaspora studies the experiences of african memoirists who live in the united states the book shows how african diaspora memoirs beautifully and grippingly depict the experiences of african migrants over time through political social and cultural spheres in reading african diaspora memoirs from the transatlantic slave trade period to the present a reader can understand the complexity of the african migrant legacy and evolution author toyin falola argues that memoirs are significant not only in their interpretation of events conveyed by the memoirists but also in demonstrating how interpersonal and human the stories told can be memoirs are powerful because they are emotionally captivating and because important themes and events circulate around a particular person in this case the memoirist undoubtedly a memoir is significant because it can teach anyone about a part of the human experience even if the facts are not described without bias through this sort of narrative the reader cannot help but enter into the memoirist s mind and therefore feel more empathy for them in doing so the reader can feel what the memoirist feels and see what the memoirist sees as clearly as is humanly possible in this way the historical events and life lessons become tangible and poignantly real to the reader

after four decades of british rule in colonial kenya a previously unknown ethnic name luyia appeared on the official census in 1948 the emergence of the luyia represents a clear case of ethnic invention at the same time current restrictive theories privileging ethnic homogeneity fail to explain this defiantly diverse ethnic project which now comprises the second largest ethnic group in kenya in cartography and the political imagination which encompasses social history geography and political science julie macarthur unpacks luyia origins in so doing she calls for a shift to understanding geographic imagination and mapping not only as means of enforcing imperial power and constraining colonized populations but as tools for articulating new political communities and dissent through cartography luyia ethnic patriots crafted an identity for themselves characterized by plurality mobility and cosmopolitan belonging while other historians have focused on the official maps of imperial surveyors macarthur scrutinizes the ways african communities adopted and adapted mapping strategies to their own ongoing creative projects this book marks an important reassessment of current theories of ethnogenesis investigates the geographic imaginations of african communities and challenges contemporary readings of community and conflict in africa

for far too long the western world viewed africa as unmappable terrain a repository for outsiders wildest imaginings this problematic notion has had lingering effects not only on popular impressions of the region but also on the development of the academic study of africa critical terms for the study of africa considers the legacies that have shaped our understanding of the continent and its place within the conceptual grammar of contemporary world affairs written by a distinguished group of scholars the essays compiled in this volume take stock of african studies today and look toward a future beyond its fraught intellectual and political past each essay discusses one of our most critical terms for talking about africa exploring the trajectory of its development while pushing its boundaries editors gaurav desai and adeline masquelier balance the choice of twenty five terms between the expected and the unexpected calling for nothing short of a new mapping of the scholarly field the result is an essential reference that will challenge assumptions stimulate lively debate and make the past present and future of african studies accessible to students and teachers alike
