Rural Transport In Developing Countries

2019-06-21

for more than three decades investment in the transport sector has been a priority for developing country governments with a few exceptions roads have accounted for the major part of these investments the explicit and often articulated assumption upon which the decision to allocate such large sums of money to road transport has been made is that road transport and development are inextricably linked the implicit and rarely articulated assumption is that the provision of suitable roads will lead to the operation of an adequate level of road transport services if roads do not actually produce economic development it has been argued they certainly play a major role this belief in the beneficial effects of roads is not wholly unsubstantiated clearly the provision of some form of access is vital for the development of the rural economy nevertheless the studies carried out over the last 10 15 years on the impact of highway investment have sounded a cautionary note george w wilson writing in the concluding chapter of the brookings institution studies on transport and development suggested that a much more sceptical attitude towards transport appears essential and far more attention needs to be devoted to the set of circumstances surrounding expansion of transport capacity 1 the suggestion of a more restrained attitude reflected a growing concern that transport and in particular roads was only one factor amongst a large number that needed to be integrated for effective development the concern to see road transport in a wider context partly explains the move towards the evaluation of the social as well as strictly economic benefits of road construction

Rural Rides

1979

many inhabitants of rural areas in developing countries lack adequate and affordable access to transport infrastructure services and this lack of transport opportunities constrains economic and social development this report looks at the role of rural transport in reducing poverty and considers a range of issues affecting rural mobility including costs stakeholders involved population densities and competing services it examines policies for promoting rural mobility including financial and regulatory considerations

The Rural Motor Express to Conserve Food-stuffs and Labor and to Supply Rural Transportation

1918

william e bivens iii for the first time in more than 160 years the nation's rural areas and small towns are growing faster than its metropolitan areas the 1980 census of population shows that the nonmetropolitan population increased by 15 4010 during the 1970s while the metropolitan population grew by only 9 1010 during the 1960s rural areas and small towns had lost some 2 8 million people to cities and their suburbs but during the 1970s at least 4 million more people moved into nonmetropolitan areas than left them this rural oriented population growth resulted from a number of factors including a strong preference for rural and small town living the decentralization of manufacturing and related services energy and other mining developments william e bivens iii is the senior policy fellow for rural affairs of the national governors association he is a rural development generalist providing liaison between the governors and federal officials and performing applied policy research to support improvements in rural development programs and systems for their delivery mr bivens was one of the designers of the carter administration's small community and rural development policy and provided the implementation link involving the formation of governors rural development councils mr bivens attended brown university and did postgraduate work at the university of texas where he also taught american government and politics xiv foreword and comparatively high rural birth rates along with improved infant mortality rates

Transportation and the Rural Community

1974

rural transportation facilities and services play a critical role in supporting both commerce and quality of life in rural america the cost and availability of freight transportation services affects the profitability of farms and businesses that depend on those services to bring production inputs and consumer products into rural areas and to carry local products to markets similarly passenger transportation services are important to mobility of rural residents to gain access to the opportunities and culture of the nation recent economic problems in rural communities deregulation of transportation services and increased responsibility of local governments for building and maintaining rural roads each have stimulated renewed concern for rural transportation issues this book looks at both the critical problems faced by rural regions and the successful approaches that have been used to help state and local governments as well as rural enterprises deal with those problems written by professionals who are active in the field of transportation economics and who are all at land grant institutions the text is based primarily on the experiences of the cooperative extension services and transportation institutes affiliated with land grant universities after a brief overview of emerging rural transportation issues and the educational challenges associated with those issues chapters provide a comprehensive examination of key transportation issues provision and financing of rural roads and bridges deregulation of agricultural transportation evaluation of the contribution of transportation to economic development firm level transportation management rural passenger transportation problems and solutions and the movement of hazardous materials included are several case studies of successful approaches that have been used to tackle rural transportation problems in rural areas providing in a single volume for the first time a comprehensive evaluation of rural transportation issues and potential solutions this book is a valuable resource for educators practitioners and students in the field of rural transportation
