EU Competition Law, Data Protection and Online Platforms: Data as Essential Facility 1995 all are agreed that the digital economy contributes to a dynamic evolution of markets and competition nonetheless concerns are increasingly raised about the market dominance of a few key players because these companies hold the power to drive rivals out of business regulators have begun to seek scope for competition enforcement in cases where companies claim that withholding data is needed to satisfy customers and cut costs this book is the first focus on how competition law enforcement tools can be applied to refusals of dominant firms to give access data on online platforms such as search engines social networks and e commerce platforms commonly referred to as the gatekeepers of the internet the question arises whether the denial of a dominant firm to grant competitors access to its

data could constitute a refusal to deal and lead to competition law liability under the so called essential facilities doctrine according to which firms need access to shared knowledge in order to be able to compete a possible duty to share data with rivals also brings to the forefront the interaction of competition law with data protection legislation considering that the required information may include personal data of individuals building on the refusal to deal concept and using a multidisciplinary approach the analysis covers such issues and topics as the following data portability interoperability data as a competitive advantage or entry barrier in digital markets market definition and dominance with respect to data disruptive versus sustaining innovation role of intellectual property regimes economic trade off in essential facilities cases relationship of competition enforcement with data protection law and data related competition concerns in merger cases the author draws on a wealth of relevant material including eu and us decision making practice case law and policy documents as well as economic and empirical literature on the link between competition and innovation the book concludes with a proposed framework for the application of the essential facilities doctrine to potential forms of abuse of dominance relating to data in addition it makes suggestions as to how data protection interests can be integrated into competition policy an invaluable contribution to ongoing academic and policy discussions about how data related competition concerns should be addressed under competition law the analysis clearly demonstrates how existing competition tools for market definition and assessment of dominance can be applied to online platforms it will be of immeasurable value to the many jurists business persons and academics concerned with this very timely subject

The Art of SEO 2015-09-30 the top 10 sunday times bestseller shortlisted for the ft business book of the year award 2019 easily the most important book to be published this century i find it hard to take any young activist seriously who hasn t at least familarised themselves with zuboff s central ideas zadie smith the guardian the challenges to humanity posed by the digital future the first detailed examination of the unprecedented form of power

called surveillance capitalism and the quest by powerful corporations to predict and control us the heady optimism of the internet s early days is gone technologies that were meant to liberate us have deepened inequality and stoked divisions tech companies gather our information online and sell it to the highest bidder whether government or retailer profits now depend not only on predicting our behaviour but modifying it too how will this fusion of capitalism and the digital shape our values and define our future shoshana zuboff shows that we are at a crossroads we still have the power to decide what kind of world we want to live in and what we decide now will shape the rest of the century our choices allow technology to enrich the few and impoverish the many or harness it and distribute its benefits the age of surveillance capitalism is a deeply reasoned examination of the threat of unprecedented power free from democratic oversight as it explores this new capitalism s impact on society politics business and technology it exposes the struggles that will decide both the next chapter of capitalism and the meaning of information civilization most critically it shows how we can protect ourselves and our communities and ensure we are the masters of the digital rather than its slaves

The Age of Surveillance Capitalism 2010-09-27 an informed general readership including students and interested non specialists academics from business sociology politics management science and technology studies and emerging fields such as critical algorithm studies will find it a stimulating and entertaining read reflective practitioners who are beginning to question the potential social impacts of their work see current explosion of tech worker activism
