## 20mph Speed Reduction Initiative

2001

contains summaries of the knowledge regarding the effects of 128 road safety measures this title covers various areas of road safety including traffic control vehicle inspection driver training publicity campaigns police enforcement and general policy instruments it also covers topics such as post accident care and speed cameras

## The Handbook of Road Safety Measures

2009-10-14

international shipping is currently at a crossroads the decision of the international maritime organization imo in april 2018 to adopt an initial strategy so as to achieve by 2050 a reduction of at least 50 in maritime greenhouse gas ghg emissions vis à vis 2008 levels epitomizes the last among a series of recent developments as regards sustainable shipping it also sets the scene on what may happen in the future even though many experts and industry circles believe that the imo decision is in line with the cop21 climate change agreement in paris in 2015 others disagree either on the ground that the target is not ambitious enough or on the ground that no clear pathway to reach the target is currently visible this book takes a cross disciplinary view of the various dimensions of the maritime transportation sustainability problem cross disciplinary means that a variety of angles are used to examine the book topics and these mainly include the technological angle the economics angle the logistics angle and the environmental angle the book reviews models that can be used to evaluate decisions policy alternatives and trade offs for sustainable shipping a spectrum of technical logistics based and market based measures are being contemplated all may have important side effects as regards the economics and logistics of the maritime supply chain including ports and hinterland connections the objective to attain an acceptable environmental performance while at the same time respecting traditional economic performance criteria so that shipping remains viable is and is likely to be a central goal for both industry and policy makers in the years ahead at the same time policy fragmentation is likely to create distortions of competition and sub optimal solutions this book attempts to address these issues and identify better solutions divsustainable shipping a cross disciplinary view includes chapters that cover many relevant topics these include a general view of maritime transport sustainability green ship technologies information and communication technologies icts for sustainable shipping green tramp ship routing and scheduling green liner network design and speed optimization market based measures oil pollution ship recycling sulphur emissions ballast water management alternative fuels and green ports are also covered the book concludes by discussing prospects for the future with a focus on the imo initial strategy this book contains a unique wealth of information on sustainable shipping the knowledge it provides is rigorous complete and well supported by statistics technical reports and scientific references the treatment of the various topics is not only informative but also analytical and critical gilbert laporte maritime economics logistics 12 may 2020

## Sustainable Shipping

2019-02-11

a growing body of evidence from economic studies shows areas where appropriate policies can generate health and other benefits at an affordable cost sometimes reducing health expenditure and helping to redress health inequalities at the same time

## Promoting Health, Preventing Disease The Economic Case

2015-10-29

this publication provides comprehensive advice on the use of traffic calming measures covering the relevant legislation design effectiveness and installation as well as examining general considerations it examines each of the methods of traffic calming and their background cost and maintenance effectiveness and environmental impact

## Traffic calming

2007-03-30

the committee's report examines the challenges involved in efforts to reduce carbon emissions from the UK transport sector and makes recommendations to improve future progress as part of its overall priority for the current parliament of focusing on climate change issues topics discussed include the government's strategic priorities measures to reduce carbon emissions from road transport trains water freight and aviation emissions from developing economies the future price and availability of oil the report finds that reducing carbon emissions from transport is particularly challenging given its dependence on oil with transport being the only sector of the UK economy in which carbon emissions were higher in 2004 than the baseline year of 1990 and projected emissions likely to be higher in 2020 than in 1990 amongst the report's 66 conclusions and recommendations the committee raises concerns over the lack of consistency and accuracy in methods used by the government to calculate emissions projections and highlights the need for more decisive action to actively encourage modal shift towards lower carbon modes of transport such as trains buses and low carbon cars and lorries and to discourage marginal car and plane journeys it recommends the introduction of a national road user charging scheme as soon as technically possible and a new policy to enforce speed limits and an increase in air passenger duty and taxes on domestic flights the report also calls for better local rail services and the need to make rail fare and ticketing structures simpler and more transparent in order to encourage greater use of rail services and the need for a public information campaign to raise awareness about the reality and dangers of climate change and a cross party approach to the measures required to tackle it
