for too long false perceptions and often policy have led teachers to believe they must choose between teaching reading and teaching content as teachers however we know that for students to be successful in all subjects they must have a strong foundation in reading and writing reading for learning using discipline based texts to build content knowledge addresses this issue head on exploring the reality which is that reading and content can and should go hand in hand to support subject area learning drawing on research in human cognition reading development and discipline specific pedagogies heather lattimer provides practical classroom tested approaches to helping students access and critically respond to content based texts such as selecting texts that enhance student learning experiences using strategies to help focus student readers before they engage with texts supporting comprehension in content areas through discussion and writing analyzing texts and applying content learning rich in classroom examples the book strives not to remake

content teachers into reading teachers but instead to support content teachers in using texts to deepen students understanding of the core ideas critical information and ways of thinking in the disciplines

## **Praxis II English Language Arts Content Knowledge 5038 Study Guide 2019-2020 2018-09**

improving learning experiences for all students is the ultimate goal of research in technology use in education with more availability and better usability of technology in schools the potential for teachers to use digital tools in schools is greater than ever however a key factor determining whether new technologies are adopted is the extent to which teachers know how to use them to support students learning the special knowledge of how technologies can support students learning of subject area content is known as technological pedagogical content knowledge tpack this study explored the relationship of

accomplished teachers tpack confidence to their use of technology with students and to their teaching and learning contexts in an online survey 307 national board certified teachers provided information about the frequency and breadth of their computer use with students their use of computers in their personal lives the school classroom and personal resources available to them for learning and the people in their learning networks supporting their learning to use new technologies for teaching although the representativeness of the sample was limited and the measures self reported they provided rich opportunities to discover relationships and suggest avenues for supporting teacher learning of new technologies analyses showed that these accomplished teachers confidence in their knowledge of how to use new technologies for teaching was different from their confidence in using technologies more generally further tpack confidence related to student use of computers in the classroom no associations were found between tpack confidence and age gender grade levels subject areas or student populations however confidence in teaching with technology did relate to measures of the teachers learning resources more varied learning resources and more productive social learning networks were associated with higher tpack confidence three key types of support provided by learning partners learning together posing challenges and connecting the teacher to others to learn from were significantly more common among high tpack teachers findings in this study point to ways we might further understand and subsequently increase teacher confidence in using new technologies to support student learning several questions are raised for future research do learning resources lead to confidence in knowledge or does confidence lead to awareness of existing resources to what extent can tpack be measured

without first assessing the teacher's pack and how might we develop survey measures that reliably capture the complexity of technological pedagogical content knowledge understanding tpack and the conditions under which it develops is an important field of research as we strive to help teachers learn to use new technologies effectively to support powerful student learning
