every student of the twentieth century has heard both of the great viennese economist friedrich

von hayek and of the equally great philosopher ludwig wittgenstein but what isn't well known is that the two were distant cousins and that shortly after wittgenstein's death in 1951 hayek set out to write a biography of his cousin the project was derailed by wittgenstein family members who felt it was too soon to publish such a work especially one like hayek's so candid about his cousin's difficulties and depressions but hayek's draft acquired an underground readership and wittgenstein's biographers have used it extensively. Here finally is the text of that work itself a true goldmine in being one great thinker's view of another whom he knew personally even if not well hayek's account has the great merit of being close to its subject the draft moreover sheds light not only on wittgenstein but on hayek as well
