this report describes the development of a frequency modulated vhf
data transmitter an hf frequency shift keying low data rate transmitter and a dual frequency hf
command receiver these units were designed for high altitude balloon control and data
systems an antenna for the data transmitter and a detector for fsk were also designed author
in recent years the focus in groundwater studies has expanded to also include groundwater
contamination and remediation studies as a part of resource evaluations while there are other
books on the subject field hydrogeology a guide for site investigations and report preparation
provides the first integrated presentation of the american society of testing materials astm
standards us geological survey usgs and us environmental protection agency epa field
techniques it also includes access to a site that contains software for designing aquifer tests
and aquifer recharge experiments written by an author with more than 40 years of experience
