every leader should know the surprising research and strange conclusions of behavioral economics for fairness teamwork and productivity you and your colleagues don't always make rational decisions sometimes that's a problem that leaders must address and sometimes that can be a good thing when employees put their colleagues' interests ahead of their own. Dr. Matthias Sutter, a leading economist from Germany's world-renowned Max Planck Institute, explains the latest surprising insights based on behavioral economics research. The book explains how people tick, how they react to incentives (monetary or non-monetary) in nature, and what that means for working together or against each other at work. Dr. Sutter summarizes new and classic behavioral science research that applies to the everyday business world so leaders can improve teams and organizations. The research-based way to find out which factors are important for professional success from career entry to senior management: start your career on the right footing, advance quicker, and strategize how to meet your goals. Understand what's holding your colleagues back from productivity and implement evidence-based changes. Identify hidden biases.

in yourself and others to overcome inequalities and inefficiencies become a better leader and decision maker by learning to interpret people's actions individuals organizations and teams will benefit from the often counterintuitive wisdom in this book based on the author's 20 years of research plus the findings of the world's top behavioral economists behavioral economics for leaders can help you get your team and your organization where you want to lead it

Behavioral Economics for Leaders

2023-01-05

economics has become a monolithic science variously described as formalistic and autistic with neoclassical orthodoxy reigning supreme so argue dimitris milonakis and ben fine in this new major work of critical recollection the authors show how economics was once rich diverse multidimensional and pluralistic and unravel the processes that lead to orthodoxy's current predicament the book details how political economy became economics through the desocialisation and the dehistoricisation of the dismal science accompanied by the separation of economics from the other social sciences especially economic history and sociology it is argued that recent attempts from within economics to address the social and the historical have failed to acknowledge long standing debates amongst economists historians and other social scientists this has resulted in an impoverished historical and social content within mainstream economics the book ranges over the shifting role of the historical and the social in economic theory the shifting boundaries between the economic and the non economic all within a methodological context schools of thought and individuals that have been neglected or marginalised are treated in full including classical political economy and marx the german and british historical schools american institutionalism weber and schumpeter and their programme of socialökonomik and the austrian school at the same time developments within the mainstream tradition from marginalism through marshall and keynes to general equilibrium theory are also scrutinised and the clashes between the various camps from the famous methodenstreit to the fierce debates of the 1930s

and beyond brought to the fore the prime rationale underpinning this account drawn from the past is to put the case for political economy back on the agenda this is done by treating economics as a social science once again rather than as a positive science as has been the inclination since the time of Jevons and Walras it involves transcending the boundaries of the social sciences but in a particular way that is in exactly the opposite direction now being taken by economics imperialism drawing on the rich traditions of the past the reintroduction and full incorporation of the social and the historical into the main corpus of political economy will be possible in the future

From Political Economy to Economics
