the text of the qur an appears to many to be desperately muddled and lacking any coherence the composition of the qur an provides a systematic presentation of the writing processes or rhetoric and argues that there is indeed a coherence to the qur anic text michel cuypers shows that the ancient semitic texts of which the qur an is a part do not obey the greek rhetoric and that their basic principle is therefore not progressive linearity but symmetry which can take several forms following precise rules he argues that the knowledge of this rhetorical code allows for a radically new analysis of the structure and rhetoric of the qur an using copious amounts of examples from the text the composition of the qur an provides a new theoretical synthesis of qur anic rhetoric as well as a methodology for their application in further exegesis a landmark publication in the field of qur anic studies this volume will be of interest to scholars and researchers in islamic studies religious studies and arabic studies
