the traditional division of labor between the database which only stores and manages sql and xml data for fast easy data search and retrieval and the application server which runs

application or business logic and presentation logic is obsolete although the book's primary focus is on programming the Oracle database the concepts and techniques provided apply to most RDBMSs that support Java including Oracle, DB2, Sybase, MySQL and PostgreSQL. This is the first book to cover new Java JDBC, SQLJ, JPublisher and Services features in Oracle database 10g release 2. The coverage starts with Oracle 9i release 2. This book is a must read for database developers, audience: DBAs, database applications developers, data architects, Java developers, JDBC, SQLJ, J2EE and/or mapping frameworks and to the emerging services assemblers. Describes pragmatic solutions, advanced database applications as well as provision of a wealth of code samples. Addresses programming models which run within the database as well as programming models which run in middle tier or client tier against the database. Discusses languages for stored procedures when to use proprietary languages such as PL/SQL and when to use standard languages such as Java. Also running non-Java scripting languages in the database. Describes the Java runtime in the Oracle database 10g i.e. Oracle JVM, its architecture, memory management, security management, threading, Java execution, the native compiler i.e. ncomp, how to make Java known to SQL and PL/SQL, data types, mapping, how to call out to external components, EJB components, ERP frameworks and external databases. Describes JDBC programming and the new Oracle JDBC 10g features, its advanced connection services, pooling, failover, load balancing and the fast database event notification mechanism for clustered databases, RAC in grid environments. Describes SQLJ programming and the latest Oracle SQLJ 10g features, contrasting it with JDBC. Describes the latest database services features, services concepts and services oriented architecture, SOA for DBA, the database as services provider and the database as services consumer. Abridged coverage of JPublisher 10g, a versatile complement to JDBC, SQLJ and database services.
