the last decade has seen a substantial increase in commodity computer and network performance increasingly computing addresses collaboration

cycle and data sharing and other modes of interaction involving distributed resources grid computing is an emerging technology that enables large scale sharing of widely distributed resources and coordinated problem solving and collaboration between groups of scientists riding on the success of the first two workshops this yearocos workshop continues the tradition of providing a useful forum for discussion among researchers developers and users of grid computing from academia business and industry this volume is a collection of the international contributions presented at the workshop with a focus on grid computing and its applications in science and engineering

Mustang 1964 1/2-1973 Restoration Guide 2006

one year after the tragic events of the fallen star the jedi fight to break the nihil s control over the galaxy the galaxy is divided following the shocking destruction of starlight beacon the nihil have established an impenetrable barrier called the stormwall around part of the outer rim where marchion ro rules and his followers wreak havoc at his every whim jedi trapped behind enemy lines including avar kriss must fight to help the worlds being pillaged by the nihil while staying one step ahead of the marauders and their nameless terrors outside the nihil s so called occlusion zone elzar mann bell zettifar and the other jedi work alongside the republic to reach the worlds that have been cut off from the rest of the galaxy but every attempt to breach the stormwall has failed and even communication across the barrier is impossible the failures and losses weigh heavily upon both elzar and bell as they search desperately for a solution but even if the republic and jedi forces manage to breach the stormwall how can the jedi fight back against the nameless creatures that prey on the jedi s connection to the force and what other horrors does marchion ro have in store as desperation for both the jedi and the republic grows any hope of reuniting the galaxy could be all but extinguished

within nasa s high performance computing and communication hpcc program nasa glenn research center is developing an environment for the analysis design of aircraft engines called the numerical propulsion system simulation npss npss focuses on the integration of multiple disciplines such as aerodynamics structures and heat transfer along with the concept of numerical zooming between zero dimensional to one two and three dimensional component engine codes in addition the npss is refining the computing and communication technologies necessary to capture complex physical processes in a timely and cost effective manner the vision for npss is to create a numerical test cell enabling full engine simulations overnight on cost effective computing platforms of the different technology areas that contribute to the development of the npss environment the subject of this paper is a discussion on numerical zooming between a npss engine simulation and higher fidelity representations of the engine components fan compressor burner turbines etc what follows is a description of successfully zooming one dimensional row by row high pressure compressor analysis results back to a zero dimensional npss engine simulation and a discussion of the results illustrated using an advanced data visualization tool this type of high fidelity system level analysis made possible by the zooming capability of the npss will greatly improve the capability of the engine system simulation and increase the level of virtual test conducted prior to committing the design to hardware
