brazil russia india china and south africa the indonesian story suggests a different pathway to emerging power status this pathway is based not so much on military or economic resources rather it lies in the ability of a country to develop a positive virtuous correlation among three factors democracy development and stability while pursuing a foreign policy of restraint towards neighbours and active engagement with the world at large this is the key lesson from the story of indonesia that this book seeks to present it analyses indonesia s foreign policy and international role under the democratic regime with particular focus on its role as a leader of asean its relationship with the major powers of the asia pacific and its place in the global order of the 21st century contents why indonesia matters democracy development and stability creating a virtuous cycle indonesia and the regional architecture indonesia and the major powers indonesia as a global actor a nation on the move indonesian voices readership general public students policy makers and think tanks intellectuals key features first book that recognizes indonesia as an emerging power first book in a long time on overall indonesian foreign policy among the first to study impact of democratization on foreign policy of indonesia keywords indonesia rising powers asean asia pacific security reviews indonesia today offers an inspiring example of how democracy development and stability can be made to work together to enhance a nation s prestige and influence on the global stage amitav acharya s indonesia matters is an insightful account of the foreign policy of the world s largest muslim country demonstrating how democratic transformation strengthened indonesia s leadership in asean the asia pacific and the world at large surin pitsuwan former foreign minister of thailand and secretary general of asean 2008 12 can a major new power rise in the community of nations without threatening its neighbours destabilizing existing arrangements and producing an arms race this is a major question for this century after the past one in which germany and japan established such alarming precedents china and india do not provide much reassurance that we are wiser than we were indonesia however with one of the lowest arms expenditures in the world either per capita or in relation to gnp looks a promising case for an alternative model this book is a very timely study of a critical issue for our times anthony reid emeritus professor college of asia and the pacific australian national university amitav acharya has produced a timely and illuminating examination of indonesia s foreign policy since the establishment of democracy after suharto s period in power drawing on extensive interviews and keen observations amitav skilfully traces the evolution of indonesia s diplomacy from its modest regional roots to the rarefied world of global engagement this is an important book and a necessary read for all those who follow indonesia s remarkable ascent kurt campbell assistant secretary of state for east asian and pacific affairs 2009 13 acharya has provided an excellent contribution in the discourse on indonesia s foreign policy he has shown the unique pathway of the country in achieving its current place in regional and global politics through the virtuous cycle of democracy development and stability the indonesian quarterly

Diplomatic Material

in diplomatic material jason dittmer offers a counterintuitive reading of foreign policy by tracing the ways that complex interactions between people and things shape the decisions and actions of diplomats and policymakers bringing new materialism to bear on international relations dittmer focuses not on what the state does in the world but on how the world operates within the state through the circulation of humans and nonhuman objects from examining how paper storage needs impacted the design of the british foreign office building to discussing the 1953 nato decision to adopt the 30 caliber bullet as the standard rifle ammunition dittmer highlights the contingency of human agency within international relations in dittmer s model which eschews stasis structural forces and historical trends in favor of dynamism and becoming the international community is less a coming together of states than it is a convergence of media things people and practices in this way dittmer locates power in the unfolding of processes on the micro level thereby reconceptualizing our understandings of diplomacy and international relations

EU and EEA Law Litigation Before National Courts

this book seeks to critically review and evaluate the changes and consistencies in how warfare is interpreted and represented by academics mass media outlets and political actors in the 21st century the authors suggest that it is essential to understand the evolution and transformation of contemporary warfare s conceptualisation and practice in order to make sense of the current global geopolitical transformations that are in process from a unipolar to multipolar global order they therefore examine the various key actors in international relations from conceptual theoretical and empirical perspectives through thematic chapters that demonstrate the increasingly central role played by intangible factors in the representation and management of contemporary armed conflict the book stresses the need to reflect and rethink the potentially highly problematic trajectory of the global community within the framework of 21st century warfare s political and informational influence and
