Are we the chosen people? 1849 an urgent case for climate change action that forcefully sets out in economic ethical and political terms the dangers of delay and the benefits of action the risks of climate change are potentially immense the benefits of taking action are also clear we can see that economic development reduced emissions and creative adaptation go hand in hand a committed and strong low carbon transition could trigger a new wave of economic and technological transformation and investment a new era of global and sustainable prosperity why then are we waiting in this book nicholas stern explains why notwithstanding the great attractions of a new path it has been so difficult to tackle climate change effectively he makes a compelling case for climate action now and sets out the forms that action should take stern argues that the risks and costs of climate change are worse than estimated in the landmark stern review in 2006 and far worse than implied by standard economic models he reminds us that we have a choice we can rely on past technologies methods and institutions or we can embrace change innovation and international collaboration the first might bring us some short term growth but would lead eventually to chaos conflict and destruction the second could bring about better lives for all and growth that is sustainable over the long term and help win the battle against worldwide poverty the science warns of the dangers of neglect the economics and technology show what we can do and the great benefits that will follow an examination of the ethics points strongly to a moral imperative for action why are we waiting

Why Are We Waiting? 2009-09 what are humans what makes us who we are many think that we are just complicated machines or animals that are different from machines only by being conscious in are we bodies or souls richard swinburne comes to the defence of the soul and presents new philosophical arguments that are supported by modern neuroscience when scientific advances enable neuroscientists to transplant a part of brain into a new body he reasons no matter how much we can find out about their brain activity or conscious experiences we will never know whether the resulting person is the same as before or

somebody entirely new swinburne thus argues that we are immaterial souls sustained in existence by our brains sensations thoughts and intentions are conscious events in our souls that cause events in our brains while scientists might discover some of the laws of nature that determine conscious events and brain events each person s soul is an individual thing and this is what ultimately makes us who we are

Are We There Yet? 2019 the united states of america has been in trouble for a long time but before we can correct the problems we need to know what they are the time has come for the people to know the truth about what is happening in our cities our states and our country our government has placed an unnecessary burden upon the people of the united states by making mistakes and failing to learn from them now we must pay the price we live in a free land but we take it for granted allowing others to work and fight for us instead of valuing the treasure that is freedom of speech we contentedly stay silent the only way to bring about the necessary change is to stand up for what we believe in and let our leaders know that we will not sit idly by while they destroy this great country it is time we all say enough is enough

Are We Bodies Or Souls? 2015 are we not men offers an innovative approach to gender and embodiment in the hebrew bible revealing the male body as a source of persistent difficulty for the hebrew prophets drawing together key moments in prophetic embodiment graybill demonstrates that the prophetic body is a queer body and its very instability makes possible new understandings of biblical masculinity prophecy disrupts the performance of masculinity and demands new ways of inhabiting the body and negotiating gender graybill explores prophetic masculinity through critical readings of a number of prophetic bodies including isaiah moses hosea jeremiah and ezekiel in addition to close readings of the biblical texts this account engages with modern intertexts drawn from philosophy psychoanalysis and horror films isaiah meets the poetry of anne carson hosea is seen through the lens of possession films and feminist film theory jeremiah intersects with psychoanalytic discourses of hysteria and ezekiel encounters daniel paul schreber s memoirs of my nervous illness graybill also offers a careful analysis of the body of moses her methods highlight unexpected features of the biblical texts and illuminate the peculiar intersections of masculinity prophecy and the body in and beyond the hebrew bible this assembly of prophets bodies and readings makes clear that attending to prophecy and to prophetic masculinity is an important task for queer reading biblical prophecy engenders new forms of masculinity and embodiment are we not men offers a valuable map of this still uncharted terrain

Are We Doomed? Enough Is Enough 2000 we are everywhere is a whirlwind collection of writings images and ideas for direct action by people on the frontlines of the global anticapitalist movement this is a movement of untold stories because those from below are not those who get to write history even though we are the ones making it we are everywhere wrenches our history from the grasp of the powerful and returns it to the streets fields and neighbourhoods where it was made

Are We Prepared for Cyberwar? 2016 why is it that all humanity yearns so much for love is there anything or anyone who does not want to love and be loved why do we feel a special somethinga merging with when we are in love or hear the four letter wordlove could it not be because love touches the core essence of our beings and we react the way we do because the love

atoms and molecules of our bodies recognize and identify with it it rings their bells in a manner of speaking you will also observe that more song lyrics in the whole world are about love given found longed for rejected lost etc furthermore one cannot deny that scientific experiments and natural happenings have proven that animals plants all living things react favorably when approached and treated with love typically a dog senses when we exhibit signs of fear dislike or other negative emotions which are at variance with the attributes of living love whereas a show of confidence tolerance and good disposition toward animal and man which are acceptable derivative attributes of living love will calm them and restore their confidence because like recognizes like the elixir of immortality many have journeyed far and wide seeking to find the elixir of life some think it is a magical potion that gives immortality and the quest for this portion has consumed these in a journey through the pages of this book each reader unveils for himself the logical reasons why this elixir of life is very necessary for all this book points boldly to very simple but sure pathway to this elixir of life and as i traveled through its pages not only did i move from seeking to enlightenment from understanding to knowing and then from awakening to liberating happiness because i went through a transformation i found living love this experience is my wish for all mankind mrs valentina aninyei

Are We Not Men? 2005 when we leave our destiny in the hands of others and live our life in the past we immediately destroy our future scientists in the human genome industry have proved that all humans are 99.9 percent the same why then are some ethnicities progressive and others nonprogressive our current problems are not with the slave or colonial masters we are becoming the problem now had we continued in the legacy of our ancestors simply known as slaves we ought to have been the pride and joy of the whole world they went through unimaginable pain sorrow hardship and torment they survived and even succeeded by leaving a godly legacy behind in the negro spiritual songs and in arts education industry and every conceivable field our current major problems as blacks in africa and all over the world simply put are leadership and disunity we do the dirty work by self destroying ourselves and each other only few illiterate caucasian would engage in overt discrimination the majority of us have been trained in the art and act of covert self destruction and in the destruction of the whole we have so much zeal but without knowledge we must bear in mind that zeal without knowledge is dead so also knowledge without zeal is equally lifeless romans 10:2 not until we harness our zeal and knowledge comprehensively can we live a progressive life it has been said that if the west is to stand still and halt all development and progress africa would never catch up yet we have phds in every conceivable field do we blame that on the ancestors of the slave or colonial masters no we are to be blamed we are becoming the problem now those who have ears to hear let them hear because time is of the essence
