Basic English grammar 2013 an inquiry made to obtain any information is known as an interrogation while asking the person tries to get an answer that allows him to satisfy his doubts the interviewers often ask simple questions in a very twisted fashion to confuse the candidates difficult questions answers reflect the knowledge of the giver as well as his overall personality for example which is heavier a kilogram of feathers or 1000 grams of lead solution both the weights are equal and what happened in kolkata yesterday from 8 to 9 o clock solution an hour had passed these questions have a trick because they are framed in such a way that the answers seem simple but in reality they are not it can be said that the questioners confuse the candidates as they hide their answers using rhetorical resources and various devices in some cases the answer is found in the question itself but in secret tricky questions are also used for mental activities logical practice like a truck driver passing down a street in the wrong direction some policemen saw him but they didn't say

anything to him why solution because the truck driver ^{into} was on foot he shaves all day but still has a beard who is he solution barber some months have thirty days and others thirty one but how many months have twenty eight solution every month has at least twenty eight days which object becomes wet when it dries solution towel how do you draw a square with three lines solution draw the square first and then draw three lines inside the square thus an answer to a tricky question can lead to confusion due to the confusion generated question these types of questions are very specific to the areas in which people's knowledge or behavior is evaluated generally such difficult questions can be perceived as misleading or incorrect because something is being implied that is not in reality however they can also be seen as methods whose precise purpose is to test the candidate and determine whether he or she is fully capable of answering the question that he or she is saying i know in this way about five thousand questions and answers have been given in the present book which is equally useful for all competitive examinations

this is a book about the one objective truth of existence and the countless subjective falsehoods accepted as true by the vast majority of humanity this book focuses especially on new age guru ken wilber s fallacious system known as integral theory his theory of everything where he attempts to place a wide diversity of mystical theories and the teachings of various gurus into a single framework that supposedly explains everything wilber s system is best summed up in his statement i have one major rule everybody is right more specifically everybody including me has some important pieces of truth and all of those pieces need to be honored cherished and included in a more gracious spacious and compassionate embrace it is exactly this sentiment that underlies the new age hegemony of relativism and subjectivism of everyone having their own experiences their own path their own truth in such a system it becomes impossible for people to reach the one absolute objective truth of existence which grounds everything in order to reach the truth the task is not to pretend to people that they are all right but to show where they have gone wrong where they have strayed from reason and logic where they have succumbed to
~~ism via emotion~~ **17/24** sensory empiricism faith and mysticism wilber adopts a fully irrationalist stance when he claims that the enlightened are what he

calls trans rational i e they have somehow transcended
reason and logic and thus reached the zone according to wilber where they can apprehend absolute reality in fact absolute reality insofar as it is intelligible is nothing but the expression of the principle of sufficient reason and its corollary occam s razor how do we eliminate the infinite wrong answers to existence and reach the one infallible right answer to existence it s simplicity itself the answer to existence is the simplest and most rational possible any answer that is not rational is irrational hence false any answer that is not the simplest is wrong because reality would never privilege complexity over simplicity reality necessarily follows the path of least resistance the most economic path it does not know how to introduce superfluous needless and pointless complexity you will never understand the answer to existence if the answer you support is against rationalism and against rational simplicity

Basic Reading Power 2006-02 it is true that mankind
himself has probably always been characterized with the
main desire to determine just what spiritual truth
really is for centuries and centuries highly educated
philosophers and religious men alike have always stood
toe to toe disagreeing on spiritual truth since they
cannot all be right this would strongly indicate that
education religious persuasion or even intelligence has
little to do with our discovery of the real spiritual
truth for if these things were truly critical then
obviously the spiritual intellectual giants of history
would have agreed on spiritual truth long ago in this
work author ted even endeavors to show that the
disagreeing intellectuals skeptics of the past only
serve to reinforce christ s radical statement about our
need to just become like little children in order to
discover the spiritual truth and that literally
everyone has the same opportunity to enter the kingdom
of heaven on that basis however while super
intelligence or big degrees may not be necessary the
discovery of spiritual truth does require just one very
reasonable quality of heart which little children have
always possessed find out just what this basic quality
is as you continue your search for spiritual
truth within this simple to understand work which only
leaves the real spiritual truth left standing
