The void that is what we call her, she is cold and without emotion and does not care if you live or die. She is the space between systems, without life and without a sun to warm her. She is dangerous, but we accept the dangers in exchange for the freedom and independence she offers. The void was free of corporate involvement for the most part, but that was changing. We felt it closing in on us. *Jlaeal* is a successful smuggler, but his world is thrown into chaos when the three corporations who rule the galaxy make peace amongst themselves and send their fleets into the void to destroy the outlaw stations. As the fleets take out station after station, *Jlaeal* finds fewer places to run. Then he meets a *Divian* pirate named *Renlii*, and though it's the worst of times to fall in love, he finds himself questioning everything he thought he knew about living in the void. To further complicate matters, a mysterious hero named *Trask* arrives with plans to save the stations, but *Jlaeal* and *Trask* have a dark past, and *Jlaeal* believes him to be just as dangerous as the corporations. *How Dark the Void* is a man's personal battle for freedom, truth, and love. Through this epic journey, we discover just how dark the void can be. In the void, shadows lurk, waiting to arise. After surviving an attack by hostile aliens called shadows, *Jas Harrington* and the crew of the *Galathea* have made it back to Earth. There, the lies of the ship's acting captain mean that *Jas* faces some hard questions from the committee investigating the attack. But more urgent problems become apparent: things on Earth have changed since *Jas* went away. Strange disappearances and odd behavior lead her to the question: have shadows invaded her home planet? When the *Galathea*'s former navigator, *Sayen Lee*, investigates, she's taken hostage. *Jas* must fight to free her friend from her captors and find out what's been happening on Earth. If her suspicions are correct, all humanity is at risk. *Shadowrise* is book four in the fast-paced action-packed *Shadows of the Void* space opera series. *Mars* holds secrets beyond the realms of the known universe. *Ex*, starship security chief *Jas Harrington*, has been battling hostile aliens called shadows who are invading Earth. After finally alerting the Transgalactic Council of Earth's plight, she has escaped aboard the starship *Bricoleur*. In the brief respite from battle, she and her companions must decide the best way to continue the fight. They travel to *Jas*'s birthplace, Mars, where she uncovers some surprising facts about her past. Then, in the midst of the declining colony world, *Jas* finds something that might be the key to everything: where the shadows come from, how they operate, and how to defeat them. The race is on to free the keepers of the secret knowledge and enlist them in the desperate war to save the galaxy. *Mars Born* is book eight in the fast
