this book helps you make formatting decisions when designing your createspace book you need to decide which font should i use what font size is best should i use block paragraphs or indented how much space should i have between paragraphs if any what margins will look best the problem is that you can t see the results of your decisions until you ve finished your book and sent off for and received a proof until you get a physical book in your hand you can t get a good feeling for how these decisions will affect the appearance of your creation sure you can get representations on your computer screen but there s no way to know for example whether the text will be lost in the inner margins or whether it will be big enough to read comfortably the createspace formatting sampler 6x9 will solve that problem it is a sampler or gallery of many different formatting styles that you might use with your 6x9 trim size book here s how it works each of the 24 chapters is four pages long the first page describes the exact parameters that are used for that chapter such as font font size margins etc the next three pages continue to use that chapter s style within each chapter you will see exactly how your book would look were you to use that chapter s combination of font font size justification style etc as you look at those pages you II say things like hmm that looks nice or oh no i don t like this the text is too large to summarize for a few bucks purchase the createspace formatting sampler and consult it when making important decisions about your book this will be cheaper than going through several proofs for your book note that this book is for 6x9 trim sizes only and is in no way sponsored endorsed or otherwise affiliated with createspace

for some years we at energion publications have struggled with the process of converting manuscripts from the author's format to the final production ready layout there are an amazing arrays of software solutions to help clean up text but there is nothing quite like having it done right in the first place many of the things in this booklet will be extremely familiar to those who regularly use word processing software but writers often operate with the assumption that if it looks good on the screen what you see is what you get that lasts until the first format change we commissioned this book to help writers use some basic automatic formatting automatic footnotes paragraph styles and bibliographical formatting we ask our authors to keep it simple choose a style for your headings use bold and italics but above all position nothing using the spacebar if you use the information in this booklet you II have little difficulty and we II be able to efficiently format your book for publication we do hope these simple steps will be useful for others as well there are two sections one for micorosft word and one for openoffice the latter will generally be applicable to openoffice derivatives such as libreoffice
