2004

higher education is in trouble commentators of all stripes bemoan escalating costs and diminishing quality solutions have been offered from all quarters but tend to be piecemeal and all too often ideological in this tough minded look at the history current climate and future of university education in the united states melvyn I fein reexamines the mission of higher education and outlines what institutions can do to better prepare students for an ever more complex techno commercial society fein argues that students must have the opportunity to explore and discover what works for them and that the most important tool for institutions of higher education is self direction professors must be allowed to teach in their own ways bringing their own experience into the classroom since university missions differ both universities and professors need the freedom to make decisions independently the imminent need is for a democratic elite consisting of self directed leaders who possess technical and social expertise as well as personal motivation the tools for change are appropriate curricula communities of learners and a genuine marketplace of ideas while there is no magic bullet fein contends that we can and should build on the achievements of the past so as to evolve more responsive educational institutions those that promote merit responsibility and universalism

2013-12-05

valuable information on corrosion fundamentals and applications of aluminum and magnesium aluminum and magnesium alloys are receiving increased attention due to their light weight abundance and resistance to corrosion in particular when used in automobile manufacturing these alloys promise reduced car weights lower fuel consumption and resulting environmental benefits meeting the need for a single source on this subject corrosion resistance of aluminum and

magnesium alloys gives scientists engineers and students a one stop reference for understanding both the corrosion fundamentals and applications relevant to these important light metals written by a world leader in the field the text considers corrosion phenomena for the two metals in a systematic and parallel fashion the coverage includes the essentials of corrosion for aqueous high temperature corrosion and active passive behavior of aluminum and magnesium alloys the performance and corrosion forms of aluminum alloys the performance and corrosion forms of magnesium alloys corrosion prevention methods such as coatings for aluminum and magnesium electrochemical methods of corrosion investigation and their application to aluminum and magnesium alloys offering case studies and detailed references corrosion resistance of aluminum and magnesium alloys provides an essential up to date resource for graduate level study as well as a working reference for professionals using aluminum magnesium and their alloys

this book is a concise guide to the prevention and management of post surgical ocular infections covering both common and serious conditions divided into 24 chapters the text begins with discussion on preventive aspects including an introduction to the operating theatre air flow and water requirements and patient and personnel preparation the following sections describe the diagnosis treatment and prevention of infections resulting from different ocular surgeries this practical guide is highly illustrated with clinical photographs and flow charts highlighting significant aspects of prevention and management key points concise guide to prevention and management of post surgical ocular infections covers both common and serious conditions resulting from different types of surgery explains basic preventive measures relating to the operating theatre and personnel highly illustrated with clinical photographs and flow charts

Implementing IT Governance - A Practical Guide to Global Best Practices in IT Management

2010-06-01

the work of form poetics and materiality in early modern culture explores the resurgent interest in

literary form and aesthetics in early modern english studies essays by leading international scholars reflect on the legacy of historicist approaches and on calls for a renewal of formalist analysis as both a tool and as a defence of our object of study as literary critics this collection addresses the possibilities as well as the challenges of combining these critical traditions it tests and reflects on these through practice it also establishes new lines of enquiry by expanding definitions of form to include the material as well as theoretical implications of the term and explores the early modern roots of these connections the period s most famous poets such as sidney spenser shakespeare jonson and jonson appear alongside anne southwell thomas campion and many anonymous poets and songwriters the work of form brings together contributors from literary history historicism manuscript study prosodic theory the history of music history of the book as well as print and manuscript culture it represents avowedly political historical work alongside aesthetic and theoretical frameworks work bridging literature and music and cognitive poetics in bringing together these diverse commitments it addresses urgent questions about how we can understand and analyse literary form in a historically rooted way and demands rigorous discussion about the status of formal and aesthetic considerations in editing in literary criticism and in teaching
