coverage of the entire course online coaching students can contact the author at monicabhandari books gmail com this book encompasses 10 chapters each chapter starts with a quick review of the important concepts followed by shortcuts tips tricks the strategic manner in which topics are inter linked in this book will help in building a strong conceptual clarity among the students for illustration questions from previous years papers of jee and neet with accurate shortest possible solutions are provided along with each topic the questions are based on the author s interactions with students who had appeared in the aforementioned competitive exams in the past years solving the carefully handpicked questions given in this book students will find themselves at ease with the chemistry paper in any competitive as well as board examination this book will enable the students with advanced abilities to attempt maximum number of questions accurately within the stipulated time remember practice is the key to success so practice more and more questions on each and every topic from a good question bank and here s the last but not the least and the most important tip revise all your incorrectly attempted questions repeatedly and bookmark important questions so that you gain perfection in attempting questions having similar concept or trick it s not always about studying hard but studying smart regards dr monica bhandari the adaptive brain ii vision speech language and motor control focuses on a unified theoretical analysis and predictions of important psychological and neurological data that illustrate the development of a true theory of mind and brain the publication first elaborates on the quantized geometry of visual space and neural dynamics of form perception discussions focus on reflectance rivalry and spatial frequency detection figure ground separation by filling in barriers and disinhibitory propagation of functional scaling from boundaries to interiors the text then takes a look at neural dynamics of perceptual grouping and brightness perception topics include simulation of a parametric binocular brightness study smoothly varying luminance contours versus steps of luminance change macrocircuit of processing stages paradoxical percepts as probes of adaptive processes and analysis of the beck theory of textural segmentation the book examines the neural dynamics of speech and language coding and word recognition and recall including automatic activation and limited capacity attention a macrocircuit for the self organization of recognition and recall role of intra list restructuring arid contextual associations and temporal order information across item representations the manuscript is a vital source of data for scientists and researchers interested in the development of a true theory of mind and brain what is thermodynamics what does statistical physics teach us in the pages of this slim book we confront the answers the reader will discover that where thermodynamics provides a large scale macroscopic theory of the effects of temperature on physical systems statistical mechanics provides the microscopic analysis of these effects which invariably are the results of thermal disorder a number of systems in nature undergo dramatic changes in aspect and in their properties when subjected to changes in ambient temperature or pressure or when electric or magnetic fields are applied the ancients already knew that a liquid a solid or a gas can represent different states of the same matter but what is meant by state it is here that the systematic study of magnetic materials has provided one of the best ways of examining this question which is one of the principal concerns of statistical physics alias statistical mechanics and of modern thermodynamics this volume demonstrates the wide array of topics in ancient warfare currently studied by researchers around the world arranged chronologically in greek and roman history sections the book takes readers through all manner of current research topics on ancient warfare from traditional battle narratives or strategic analyses of campaigns through the logistical considerations of armies in the field to the ideology of women in war and mythology the study of ancient war deals with a myriad of different topics and deals with themes in all types of history social cultural economic religious literary numismatical epigraphical ethnographical topographical prosopographical and mythical as well as the usual political and military the study of ancient war is a field that is growing in popularity and continues to surprise us with many innovative new ideas as shown in this collection of papers by established academics and current graduate
