this is one of the first studies of traditional medical education in an asian country conducting extensive fieldwork in kunming the capital of yunnan province in the people s republic of china elisabeth hsu became the disciple of a qigong master a scholarly private practitioner who almost wordlessly conveys esoteric knowledge and techniques attended seminars given by a senior chinese doctor an acupuncturist and masseur who plunges his followers into the study of arcane medical classics and studied with students at the yunnan college of traditional chinese medicine where the standardised knowledge of official chinese medicine is inculcated dr hsu compares the theories and practices of these different chinese medical traditions and shows how the same technical terms may take on different meanings in different contexts this is a fascinating insider s account of traditional medical practices which brings out the way in which the context of instruction shapes knowledge
