the field of amphibian microbial ecology has greatly advanced in recent years the work published to date has shown that amphibian skin bacterial communities can be influenced by host species host life history stage environmental conditions surrounding bacterial communities that serve as reservoirs and external biotic agents such as pathogens as the ecology of amphibian microbial symbiosis is a relatively new field there are still many unanswered questions the aim of this research topic is to highlight recent research on amphibian microbiomes that addresses relevant questions on the ecology of amphibian microbe interactions the publications gathered in this research topic have expanded our knowledge on the role of microbial symbionts of amphibians and have revealed novel insights that can direct the next set of research questions

we suggest that soon the field will move from the basic and necessary descriptions of microbial communities to more experimental approaches that include the use of omics methods and a variety of novel analytic and multivariate approaches in addition to providing more insights into the microbial and disease ecology of amphibians these studies may lead to effective ways to manipulate the microbiome to achieve protection from diseases such as chytridiomycosis

this art unit is based upon the artistic premise that all artists make use of some basic shapes when developing an image the lessons are based upon letters and shapes that students learn about on an ongoing basis one preferred strategy is for the teacher to demonstrate each step with the students following his or her example it is suggested that the teachers make large samples of each template and then physically manipulate these templates to build creatures or characters these larger templates could also be incorporated into a creative center where younger students can experiment with building creatures this art and math lesson provides a teacher and student section with a variety of step by step student projects and evaluation to create a well rounded lesson plan

Issues in Logic, Operations, and Computational Mathematics and
