A History of Medieval Europe 1968 purchase one of 1st world library s classic books and help support our free internet library of downloadable ebooks visit us online at 1stworldlibrary.org all divisions of history into periods are artificial in proportion as they are precise in history there is strictly speaking no end and no beginning each event is the product of an infinite series of causes the starting point of an infinite series of effects language and thought government and manners transform themselves by imperceptible degrees with the result that every age is an age of transition not fully intelligible unless regarded as the child of a past and the parent of a future even so the species of the animal and vegetable kingdoms shade off one into another until if we only observe the marginal cases we are inclined to doubt whether the species is more than a figment of the mind yet the biologist is prepared to defend the idea of species and in like manner the historian holds that the distinction between one phase of culture and another is real enough to justify and indeed to demand the use of distinguish names
