1981

a stunning and intimate biography of margaret hamilton the computer engineer who helped apollo 11 and mankind get from the earth to the moon first hand accounts exclusive interviews with the legendary margaret hamilton and detailed science populate the pages of this remarkable biography in 1969 mankind successfully left our atmosphere and landed on the moon it took countless hours of calculations training wonder and sacrifice from all of the men and women who worked hard to make that landing one of those people was margaret hamilton a young computer engineer hamilton was hired to develop the completely new software used in the groundbreaking apollo space program soon she became the lead engineer one of the few women in the almost entirely male dominated profession but it wasn't always easy in the woman in the moon science writer and journalist richard maurer

destination moon 2019 dives deep into the backstory of this extraordinary woman with first hand interviews and access to primary sources this striking biography perfectly captures the exciting atmosphere of the space race and the inspiring figure of margaret hamilton

Operator's Manual

1993

this book considers the provisional nature of cities in relation to the anthropocene the proposed geological epoch of human induced changes to the earth system it charts an environmental history of curfews admonitions and alarms about dwelling on earth provisional cities are explored as exemplary sites for thinking about living in this unsettled time each chapter focuses on cities settlements or proxy urbanisations including past disaster zones remote outposts in the present and future urban fossils the book explores the dynamic changing and contradictory relationship between architecture and the global environmental crisis and looks at how to re position architectural and urban practice in relation to wider intellectual environmental political and cultural shifts the book argues that these rounder and richer accounts can better equip humanity to think through questions of vulnerability responsibility and opportunity that are presented by immense processes of planetary change these are cautionary tales for the

anthropocene central to this project is the proposition that living with uncertainty requires that architecture is reframed as a provisional practice this book would be beneficial to students and academics working in architecture geography planning and environmental humanities as well as professionals working to shape the future of cities

Environmental Health Perspectives

1995

this second revised and updated edition is a practical handbook on clinical trials in the growing field of osteoporosis topics covered include study design technical issues data collection quality assurance data analysis and presentation clinical trials in osteoporosis takes the user through the process step by step from start to finish it also provides a background on regulatory guidelines ethical implications endpoints current therapies and the ideal drug to use it will serve as a practical manual for clinicians and scientists new to the subject and provide a standard for existing centers to measure themselves against

precision and accuracy are terms that are used in quantitative scientific fields to describe the reproducibility of a measurement or the capacity of a measurement to quantify the actual biological matter present precision and accuracy are also important applications in the quality control and quality assurance of the performance and interpretation of bone mass measurements precision and accuracy also reflect the values and qualities of the author of this important text in the clinical application of bone densitometry this is the first textbook of its kind devoted entirely to the proper use of this technology in the practice of medicine dr sydney l bonnick has devoted a majority of her career helping to define excellence in this exploding area and in doing so has earned the respect and admiration of the international bone densitometry community confusion abounds in this field due to the proliferation of bone densitometry devices including the various models that can measure many skeletal sites the different normative data bases used and the establishment of diagnostic categories of low bone mass dr bonnick's authoritative and carefully referenced text will certainly clarify and broaden the knowledge of those physicians who currently perform bone densitometry this text is designed to be utilized by a wide range of medical specialists endocrinologists rheumatologists gynecologists radiologists orthopedic surgeons and nephrologists

The Woman in the Moon

2017-11-02

provides a comprehensive reference to products and devices related to the treatment and rehabilitation of the spine back and neck

instrumentation and automatic control systems

Clinical Trials in Osteoporosis

1994

former nasa astronaut harrison schmitt advocates a private investor based approach to returning humans to the moon to extract helium 3 for energy production to use the moon as a platform for science and manufacturing and to establish permanent human colonies there in a kind of stepping stone community on the way to deeper space with governments playing a supporting role just as they have in the development of modern commercial aeronautics and agricultural production schmitt believes that a fundamentally private enterprise is the only type of organization capable of sustaining such an effort and eventually even making it pay off
