utilitarianism is the idea that ethics is ultimately about what makes people's lives go better while utilitarian ideas remain highly influential in politics and culture they are subject to many well developed philosophical criticisms such as the claim that utilitarianism requires too much of us and the view that it does not respect individuals rights the theory is widely thought by philosophers to be the least plausible form of consequentialism hampered by its excessive simplicity in taking utilitarianism seriously christopher woodard argues that it is not defeated by the standard objections he presents a new and rich version of utilitarianism that can answer all six common objections plausibly and in doing so launches a state of the art defence of the utilitarian tradition which has greater resources than its critics have often assumed far from being excessively simple utilitarianism is able to account for much of the complexity and nuance of everyday ethical thought and rather than being quickly dismissed utilitarian approaches to moral and political philosophy are due for renewed development and discussion

almost 400 years ago philosophers john locke and david hume implicitly defined communication as a tool for the transmission of pure ideas stating that the ideas themselves are what matter not the way in which they are expressed and exchanged now known as the transmission model this form of communication is still the foundation for academic courses in communication theory and practice and is embedded in most business literature and education that address subjects related to workplace communication organization behavior and culture leadership and conflict resolution but what if this accepted model of communication was incomplete re making communication at work argues that the transmission model of communication needs to be replaced by a new approach to communication sostrin challenges the status quo by exposing the most common myths that inaccurately define successful communication at work these misperceptions are replaced by a set of core principles that deliver a clear mandate for re making communication at work sostrin not only provides the theoretical foundation for this new approach but he uses a straightforward model and exercises that demonstrate how managers students and consultants can powerfully improve relationships decision making and collaboration with a few lines and circles

fiction get it up demands the narrator of frederick mark kramer s new novel ambiguity of himself as he lies down to rest as if his sexual energy could save him however for kramer s narrator darko sexual energy alone although it abounds in darko s memory cannot save him this is a novel about breath or as darko calls it the pneuma darko says that the pneuma can mean the breath of life or the destruction of life and in between is where this novel takes place clearly darko uses his entire life as his inspiration here inspiration meaning breathing in then darko recounts this life in ten paragraphs that are gymnastic and acrobatic and celebrate corporeal existence this is the perspiration or the breathing through life that darko has exercised his ten paragraphs though are ten breaths ten exhalations leading to a final breathing out or expiration as he takes to his bed exhausted demanding of himself

a new beginning not just the release of orgasm but the orgasmic seeding of new life a creative re fertilization of the world and the rebirth of oneself as always kramer is both resolutely readable and profoundly resonant in his work those familiar with his masterful novel apostrophe parenthesis will find in ambiguity that kramer has produced another masterpiece that rivals the best works of anyone eckhard gerdes
