## **Lego Marvel Super Heroes 2013**

wouldn't it be nice if there was a golden ticket to stem education something that incorporated science technology math and the most elusive of all engineering what if it could be applied as part of a lesson as a class on its own or as an after school club sound too good to be true it's not the golden ticket is robotics it's hard to find a better way to teach stem education and the best part is it's hands on

multidisciplinary collaborative an authentic learning experience and engaging lego robotics has exploded in popularity but despite the obvious benefits many educators are hesitant to begin a program in their school because it seems challenging mark gura has written this book to encourage you to give robotics a try although starting a robotics program may seem like a daunting task gura brings together the information you need and presents it in a manageable organized way so that you learn what lego robotics is what student activities look like how to begin how to manage a class how robotics relate to standards and much more gura concludes with more than a dozen interviews with educators trainers and even a student so you can receive first hand advice and recommendations after reading this book you will be on your way to introducing your students to lego robotics activities and competitions features a comprehensive introduction to lego robotics from a description of the materials to advice on classroom setup and curricular integration recommendations for implementing lego robotics as a first lego league team an extracurricular club or a class an appendix with more than 100 resources including links to materials information on getting started videos and more
