this is the first truly comprehensive and most up to date handbook available on modern reflector antennas and feed sources for diversified space and ground applications there has never been such an all encompassing reflector handbook in print and no currently available title offers coverage of such recent research developments the handbook consists of three volumes volume iii focuses on the range of reflector antenna applications including space terrestrial and radar the intent of this book volume is to provide practical applications and design information on reflector antennas used for several communications systems this book covers recent developments of reflector antennas used for satellite communications terrestrial communications and remote sensing applications new subjects are introduced for the first time including satellite antennas terahertz antennas pim multipaction corona deployable mesh reflector antennas and mechanical aspects of

reflector antennas in addition this book contains a separate topic on integrated feed assembly for reflector antennas covering analysis design fabrication and test
