Dysphagia Evaluation and Treatment 2017-11-13

this book presents a comprehensive approach to treating dysphagia that has been successfully applied in actual rehabilitation settings its main purposes are firstly to equip readers with a strong conceptual understanding of swallowing evaluation and treatment secondly to provide guidance on the procedure of practical comprehensive dysphagia rehabilitation in real world settings and thirdly to update readers on the latest diagnostic and treatment technologies to do so it employs the concept of swallowing rehabilitation pioneered at fujita health university rehabilitation the book is divided into 4 major sections the first of which introduces readers to the general aspects and the principle of deglutition in turn part ii offers clinical approaches to both non instrumental and instrumental evaluation of swallowing part iii addresses treatment options in swallowing rehabilitation especially exercises based on motor learning lastly part iv highlights three clinical cases demonstrating clinical approaches in dysphagic patients readers will find this text useful both as an initial guide and a reference work for assisting clinicians allowing them to further expand swallowing assessment and treatment and facilitating the development of swallowing rehabilitation in real world settings in education and rehabilitation

Complex Head and Neck Microvascular Surgery 2023-11-05

head and neck patients who undergo treatment with free tissue transfer are patients with some of the most complex perioperative needs due to nature of the defects reconstructive surgery is complex and often is the only available option offering an acceptable quality of life therefore successful recovery of these patients is of paramount importance whilst the surgery itself is of utmost importance insufficient or inappropriate pre surgical work up and post operative care may lead to reconstructive failures secondary reconstruction offers less optimal functional outcomes and may add to patient morbidity due to additional surgeries being required this book serves as a comprehensive source of information related to the pre intra and postoperative care of head and neck patients it fills a critical need for a single source that addresses all aspects of perioperative management of head and neck patients

Swallowing - Physiology, Disorders, Diagnosis and Therapy 2015-05-23

swallowing difficulty or dysphagia is a common disorder and affects all age groups from the newborn to the elderly several medical conditions like lack of dentition gastroesophageal reflux disease eosinophilic esophagitis cardiomegaly and strokes can cause dysphagia it can also follow head neck surgeries it is important to diagnose and treat dysphagia otherwise it can lead to malnutrition and dehydration improved understanding of the physiology of swallowing advances in endoscopic and radiological techniques along with an increasing elderly population has resulted in development of a separate swallowing disorders discipline this book would be an aid for clinicians educators and trainees from the fields of speech language pathology pediatrics otolaryngology gastroenterology oncology neurology geriatrics and rehabilitation all of who form a part of the multidisciplinary swallowing team

Primary Care - E-Book 2024-03-02

there s no better preparation for nurse practitioners and other adult primary care practitioners buttaro s primary care interprofessional collaborative practice 7th edition provides the concise yet thorough information that you need in today s fast paced interprofessional collaborative environment with authorship reflecting both academic and clinical expertise this comprehensive evidence based primary care text reference shows you how to

deliver effective truly interdisciplinary health care it covers every major adult disorder seen in the outpatient office setting and features a unique interprofessional collaborative approach with referral and red flag highlights and more new to this edition are chapters on health equity public health preparedness endocannabinoids and self care comprehensive evidence based accurate and current content provides a complete foundation in the primary care of adults for np students including students in doctor of nursing practice dnp programs and reflects the latest research and national and international guidelines unique interprofessional collaborative approach equips you for interprofessional collaborative practice in the contemporary healthcare environment consistent chapter format and features reflect the systematic approach used in adult primary care practice to promote improved clinical judgment skills facilitate learning and foster quick clinical reference unique referral consultation highlights indicate when the np should collaborate with or refer to other providers unique emergency referral highlights indicate when the np should refer the patient for urgent emergent care unique red flag highlights indicate issues not to be missed unique initial diagnostics boxes provide quick reference to key decision making content

Head & Neck Surgery--otolaryngology 2006

newly revised and updated this comprehensive easy to use two volume otolaryngology text is now in its fourth edition more than 30 new chapters are included that reflect advances in the field such as outcomes and evidence based medicine surgical management of nasal valve collapse and choanal atresia immunology and allergy allergic and non allergic rhinitis complications of rhinosinusitis management of dysphagia radiographic examination of the upper aerodigestive tract endoscopic evaluation of the upper aerodigestive tract cosmetic uses of botox and more coverage includes both adult and pediatric otolaryngology all chapters are written by distinguished world renowned authorities and contain summary highlights boxes summary tables and end of chapter reviews more than 2 500 illustrations complement the text

Handbook of Behavior, Food and Nutrition 2011-04-15

this book disseminates current information pertaining to the modulatory effects of foods and other food substances on behavior and neurological pathways and importantly vice versa this ranges from the neuroendocrine control of eating to the effects of life threatening disease on eating behavior the importance of this contribution to the scientific literature lies in the fact that food and eating are an essential component of cultural heritage but the effects of perturbations in the food cognitive axis can be profound the complex interrelationship between neuropsychological processing diet and behavioral outcome is explored within the context of the most contemporary psychobiological research in the area this comprehensive psychobiology and pathology themed text examines the broad spectrum of diet behavioral and neuropsychological interactions from normative function to occurrences of severe and enduring psychopathological processes

Brain Injury Medicine 2007

covers the full continuum from early diagnosis and evaluation through rehabilitation post acute care and community re entry includes assessment and treatment epidemiology pathophysiology neuroanatomy neuroimaging the neuroscientific basis for rehabilitation ethical and medicolegal issues life care planning and more

Cases in Head and Neck Cancer 2016-05-06

cases in head and neck cancer a multidisciplinary approach encompasses rich material and resources that demonstrate the complex interface between the diagnostic and clinical information necessary to successfully manage patients with head and neck cancer this must read book contains cases written by leading experts in the field that cover a wide variety of head and neck cancers i e tongue base tonsil laryngeal hpv related etc and treatment options including minimally invasive surgery such as robotic surgery and combined modality treatment protocols specifically this text addresses comprehensive cases from initial evaluation diagnosis imaging and other physiological tests to multidisciplinary treatment management surgery chemotherapy and radiation therapy additionally approaches for the management of toxicities or morbidities of cancer treatment are presented as well as care plans discharge plans and caregiver burden and survivorship issues moreover material on health literacy humanistic care and improving communication with assistive technology has been included written by clinicians specializing in speech language pathology otolaryngology medical and radiation oncology pathology nurse case management radiology dietetics among other fields this collection of authors provides one of the most complete presentations of the inner workings of the multidisciplinary care team the adult cases of head and neck cancer reviewed in this text exemplify current practice issues surrounding hpv minimally invasive robotic surgery and combined modality treatments each author threads introductory comments throughout the cases illustrating the critical role of the speech language pathologist in particular and how all clinicians must address coping with survivorship and caregiver burden issues cases in head and neck cancer intends to teach future medical practitioners how to approach the complexities associated with head and neck cancer its vast number of images and videos allow for experiential driven classroom activities this text will be an invaluable resource for the education of speech language pathologists medical students nurse care managers dietitians and any person involved in a head and neck cancer team

Core Review for Primary Care Pediatric Nurse Practitioners 2007-04-16

authored and endorsed by the national association of pediatric nurse practitioners napnap and the association of faculties of pediatric nurse practitioners afnp the core review for primary care pediatric nurse practitioners book accompanies the core curriculum for primary care pediatric nurse practitioners this core review provides practice questions for recent graduates for both pediatric and family nurse practitioner programs to use in their respective certification exams offered by the pncb and ancc review questions include the role of the pnp wellness issues growth and development genetics chronic conditions pediatric emergencies and pharmacology unique authored and endorsed by napnap the only national association of pnps unique authored and endorsed by the association of faculties of pediatric nurse practitioners afnp multiple choice practice questions cover all content on both the ncbnp and ancc certification exams questions based on the corresponding chapters in the core curriculum answer key contains rationales for both correct and incorrect responses

The Esophagus 2021-04-30

the esophagus the esophagus investigates the anatomy physiology and pathology of the esophagus this sixth edition revised and updated throughout also explores the diagnosis and treatment of various esophageal conditions it includes treatment guidelines approved by the two largest gastroenterology societies the acg and aga as befits a work co edited by two former presidents of those organizations advancements in diagnostics are presented as are developments in the surgical and drug therapies presented in full colour and boasting an unrivalled team of editors and contributing authors the esophagus sixth edition will find a home wherever the anatomy physiology and pathology of the esophagus are studied and

taught this book is accompanied by a website containing all the figures from the book in powerpoint format wiley com go richter esophagus6e praise for the fifth edition there is absolutely no doubt that this edition of the textbook will maintain its status as the go to reference for esophageal conditions and will remain a highly utilized and clinically useful resource for novice and experienced physicians and surgeons alike gastroenterology 1 july 2013

Clinical Management of Swallowing Disorders, Fifth Edition 2020-12-16

clinical management of swallowing disorders fifth edition is a textbook for speech language pathology programs that examines the diagnosis and treatment of swallowing disorders in children and adults thoroughly updated this popular text emphasizes evidence based practice multidisciplinary team management swallowing safety nutrition behavioral treatments and management following surgical options authored by two speech language pathologists and an otolaryngologist for a multidisciplinary approach the fifth edition continues to be easy to understand text for students and also serves as an up to date reference for practicing clinicians who treat swallowing disorders in hospitals rehabilitation centers nursing homes and private outpatient clinics new to the fifth edition new chapter on the aging population the anatomy and physiology chapter has been thoroughly updated and 15 beautiful new full color illustrations have been added more images and enhanced figures including additional fees and fluoroscopy video studies of swallowing disorders in head and neck cancer and stroke patients many new references easy to read tables and treatment hints information on pediatric feeding and swallowing has been updated and expanded evidence based practice methods have been updated content has been edited to be more concise applicable and reader friendly the text features numerous pedagogical aids to reinforce student understanding case study inserts in many chapters and 9 extended case studies in the final chapter 32 videos discussion questions and answers for each chapter bolded and boxed key terms throughout with an end of book glossary clinical tips clinician s roles areas of emphasis and key learning points highlighted in boxes throughout the chapters 8 appendices featuring helpful tests and tools for clinicians new full clinical swallowing examination record form included in appendix disclaimer please note that ancillary content such as documents audio and video etc may not be included as published in the original print version of this book

Parkinson's Disease: An Interdisciplinary Guide to Management 2021-11-17

evidence shows that a multidisciplinary approach to parkinson s care provides better patient outcomes and is more cost effective this new title provides a practical guide to this approach with the perspective of the person living with parkinson s firmly at its core written by experts in their field and firmly grounded in up to date evidence parkinson s disease a multidisciplinary guide to management addresses multidisciplinary intervention through the various stages of disease rather than by discipline it covers all aspects of care from pharmacological management to non drug interventions that are helpful for parkinson s symptoms this book is unique in its holistic approach to the patient and their family and will help all members of the team to implement a biopsychosocial model of health that puts the person with parkinson s at the centre of care clinician led content provides perspectives of different members of the interdisciplinary team including medics nurses physiotherapists occupational therapists and psychologists includes practical advice and top tips enhance management of common problems includes best practice for parkinson s as well as atypical parkinsonian syndromes progressive supranuclear palsy corticobasal syndrome and multiple system atrophy includes management of falls and bone health palliative care management of inpatients provides practical advice on delivering services remotely by telephone or video

The Netter Collection of Medical Illustrations: Nervous System, Volume 7, Part I - Brain

2023-12-08

offering a concise highly visual approach to the basic science and clinical pathology of the nervous system this updated volume in the netter collection of medical illustrations the ciba green books contains unparalleled didactic illustrations reflecting the latest medical knowledge revised by drs michael j aminoff scott l pomeroy and kerry h levin brain part 1 of the nervous system volume 7 integrates core concepts of anatomy physiology and other basic sciences with common clinical correlates across health medical and surgical disciplines classic netter art updated and new illustrations and modern imaging continue to bring medical concepts to life and make this timeless work an essential resource for students clinicians and educators provides a highly visual guide to this complex organ from basic neurodevelopment neuroanatomy neurophysiology and cognition to a full range of disorders including epilepsy disorders of consciousness and sleep movement disorders stroke multiple sclerosis neurologic infections neuro oncology headaches and brain trauma offers expanded coverage of timely topics like acute flaccid paralysis neurological complications of covid 19 ependymomas genetics of epilepsy and more provides a concise overview of complex information by seamlessly integrating anatomical and physiological concepts using practical clinical scenarios shares the experience and knowledge of drs michael j aminoff scott l pomeroy and kerry h levin with content overseen by experts at harvard ucsf and other leading neurology centers compiles dr frank h netter s master medical artistry an aesthetic tribute and source of inspiration for medical professionals for over half a century along with new art in the netter tradition for each of the major body systems making this volume a powerful and memorable tool for building foundational knowledge and educating patients or staff new an ebook version is included with purchase the ebook allows you to access all of the text figures and references with the ability to search make notes and highlights and have content read aloud

OROFACIAL MYOLOGY 2003-01-01

the purpose of this new edition is to bring to readers in dental speech and oral myofunctional professions the most up to date awareness of what has happened and is happening in the field of orofacial myology throughout the world in this volume the information is intended for basic and intermediate levels this expanded text also includes contributions from four continents and therapy suggestions from ten additional clinicians included are updated and expanded chapters on the scope of myofunctional disorders history of myofunctional problems and treatment regimes anatomy physiology speech dentition orthodontics and diagnostic and treatment procedures the authors intent is to provide a wide scope of information within a framework of interdisciplinary interactions for those professionals whose work impacts individuals with myofunctional disorders the considerable material on treatment includes theory principles approaches instrumentation and specific exercises and assignments considerable insights and principles from orthodontics are included throughout the text new in this volume are explanations of the importance of the dental freeway spaces as a consideration in diagnosis and treatment the authors recommend this text as a resource for learning about the background and state of the art in the united states and internationally regarding the theory and practice of orofacial myology the book will be of special interest to myofunctional clinicians speech language pathologists dentists and other interested professionals

Dysphagia Management in Head and Neck Cancers 2018-10-11

dysphagia and problems related to swallowing are common following treatment for head and neck cancers though there are books available on

dysphagia management and associated neurological conditions this is the only atlas that comprehensively discusses dysphagia related to the head and neck cancers it comprises of 33 chapters divided into five sections the initial chapters present the anatomy and physiology of swallowing and the pathophysiology of the dysphagia related structures it discusses assessment of dysphagia in detail highlighting clinical and instrumental evaluations swallowing dysfunction related to common sub site cancers and chemo radiotherapy related dysphagia are explored individually the book addresses direct and indirect swallowing therapy methods involving postures and exercises in a detailed yet simple manner to enable them to be incorporated in routine practice it also covers topics like nutritional management alternative feeding methods and unique problems associated with tracheostomy that have a great bearing on the day to day management of patients with dysphagia the current status of the research and evidence based management updates are also included additionally where appropriate videos are included for a better understanding of the subject written and edited by experts in the field the book is intended for clinicians treating head and neck cancer head and neck surgeons radiation oncologists speech and swallowing therapy specialists and trainees in these fields

Assessment of Dysphagia in Adults 2015-05-27

communication sciences and disorders from science to clinical practice fourth edition is an excellent introductory text for undergraduate students enrolled in their first course in communication sciences and disorders written by experts in the field this text contains basic information about speech disorders that are related to impairments in articulation voice and fluency language disorders in children and adults and hearing disorders that cause conductive and sensorineural hearing losses it includes basic information on the speech language and hearing sciences and practical information about assessment and intervention practices this new edition provides readers with a wide angle view of communication disorders stressing a sense of the variety of topics that speech language and hearing scientists study and the variety of individuals that audiologists and speech language pathologists treat

Communication Sciences and Disorders: From Science to Clinical Practice 2019-09-30

a spinal cord injury sci profoundly changes a person's life and can affect nearly all of the body systems practitioners managing persons with sci must treat the medical complications that arise and be equipped to help their patients return to a productive integrated life within society spinal cord injury rehabilitation medicine quick reference provides the necessary knowledge to help facilitate this process addressing over one hundred varied topics related to spinal cord injury ranging from treatment of vocal fold paralysis or post-traumatic stress disorders to intrathecal pump management and paraplegia this text is a handy reference for the busy practitioner presented in a consistent two-page format for maximum clinical utility the book is organized into three sections the first covers the medical and psychological conditions associated with spinal cord injury the second discusses common interventions while the last outlines expected functional outcomes every entry is standardized for quick look up in the office or clinic and features description etiology risk factors clinical features natural history diagnosis red flags treatment prognosis helpful hints and suggested readings all rehabilitation medicine quick reference titles offer consistent approach and organization at a glance outline format allows readers to find the facts quickly concise coverage of must-know information broken down into easy-to-locate topics fast answers to clinical questions diagnostic and management criteria for problems commonly encountered in daily practice hands-on practical guidance for all types of interventions and therapies multi-specialty perspective ensures that issues of relevance to all rehabilitation team members are addressed

Spinal Cord Injury 2009-09-04

accompanying computer disk contains videos demonstrating the types of communication disorders and articulations reviewed in the text and photos and animations showing important equipment and anatomical structures

Communication Sciences and Disorders 2011

communication sciences and disorders from science to clinical practice third edition is an excellent introductory text for undergraduate students enrolled in their first course in communication sciences and disorders written by experts in the field this text contains basic information about speech disorders that are related to impairments in articulation voice and fluency language disorders in children and adults and hearing disorders that cause conductive and sensorineural hearing losses it includes basic information on the speech language and hearing sciences and practical information about assessment and intervention practices unlike some other introductory text books this book also includes chapters on multicultural issues deafness dysarthria and dysphagia new to the third edition updated content with new information on evidence based practice new online video segments that clearly demonstrate a variety of communication disorders at different ages and severities new chapter on cleft lip and palate new information on cochlear implants and listening new information on spoken language approaches to audiologic habilitation the two chapters on preschool and school age language disorders are now combined into one chapter the two chapters on auditory rehabilitation and deaf education are now combined into one chapter in text features boxes featuring personal stories from the authors and guides to online video segments learning objectives and bolded key terms end of chapter features study questions key terms references and suggested readings instructor resources slides in powerpoint format test bank and an image bank

Communication Sciences and Disorders 2016

ideal for both trainees and experienced practitioners textbook of gastrointestinal radiology 5th edition provides detailed concise well illustrated information on all aspects of gi imaging now in a single volume for convenient point of care reference drs richard m gore and marc s levine lead a team of world renowned experts to provide unparalleled coverage of all major gastrointestinal disorders as well as the complete scope of abdominal imaging modalities every chapter has been thoroughly updated and new authors provide fresh perspectives on complex imaging topics offers streamlined actionable content in a new single volume format for quicker access at the point of care highlights the complete scope of imaging modalities including the latest in mdct mri diffusion weighted and perfusion imaging ultrasound pet ct pet mr plain radiographs mrcp angiography barium studies and ct and mr texture analysis of abdominal and pelvic malignancies features more than 1 100 state of the art images with many in full color discusses the imaging features of abdominal and pelvic malignancies that are key in an era of personalized medicine as well as the relationship of abdominal and pelvic malignancies to cancer genomics and oncologic mutations that guide novel molecular targeted and immunotherapies provides a diagnostic approach to incidentally discovered hepatic pancreatic and splenic lesions now commonly found on cross sectional imaging

Textbook of Gastrointestinal Radiology E-Book 2021-06-03

principles of deglutition is the first in class comprehensive multidisciplinary textbook to encompass the entire field of normal and disordered deglutition it is designed as the definitive text for all those who desire to further their knowledge of the dynamic and expanding field of deglutology the text is created to serve as a treasured reference for clinicians educators and trainees from such diverse backgrounds as gastroenterology speech language pathology otolaryngology rehabilitation medicine radiology and others principles of deglutition brings together the state of knowledge from 12 disciplines involved in dysphagia through contributions of over one hundred thought leaders and master clinicians for the benefit of patients and providers alike it concisely organizes the wealth of knowledge that exists in each of the contributing disciplines into one comprehensive information platform principles of deglutition provides a one stop destination for members of all specialties to obtain state of the art and critically reviewed information regarding deglutition physiology pathophysiology diagnosis and management it delivers a comprehensive and in depth review of deglutition related cerebral cortical brainstem peripheral nerves and neuromuscular mechanisms advanced diagnostic modalities and standard of care and cutting edge medical rehabilitative and surgical treatments it is an essential reference for all deglutologists

Principles of Deglutition 2012-09-27

malignancies involving structures of the head and neck frequently impact the most fundamental aspects of human existence namely those functions related to voice and speech production eating and swallowing abnormalities in voice production and in some instances its complete loss are common following treatment for laryngeal voice box cancer similarly speech eating and swallowing may be dramatically disrupted in those where oral structures e g the tongue jaw hard palate pharynx etc are surgically ablated to eliminate the cancer consequently the range and degree of deficits that may be experienced secondary to the treatment of head and neck cancer hnca are often substantial this need is further reinforced by the centers for disease control and prevention who have estimated that the number of individuals who will be newly diagnosed with hnca will now double every 10 years this estimate becomes even more critical given that an increasing number of those who are newly diagnosed will be younger and will experience the possibility of long term survival post treatment contemporary rehabilitation efforts for those treated for hnca increasingly demand that clinicians actively consider and address multiple issues beyond the obvious concerns specific to any type of cancer i e the desire for curative treatment clinical efforts that address physical psychological communicative and social consequences secondary to hnca treatment are essential components of all effective rehabilitation programs comprehensive hnca rehabilitation ultimately seeks to restore multiple areas of functioning in the context of the disabling effects of treatment in this regard rehabilitation often focuses on restoration of function while reducing the impact of residual treatment related deficits on the individual s overall functioning well being quality of life qol and ultimately optimize survivorship regardless of the treatment method s pursued for hnca e g surgery radiotherapy chemoradiation or combined methods additional problems beyond those associated with voice speech eating and swallowing frequently exist for example post treatment changes in areas such as breathing maintaining nutrition limitations in physical capacity because surgical reconstruction such as deficits in shoulder functioning concerns specific to cosmetic alterations and associated disfigurement and deficits in body image are common those treated for hnca also may experience significant pain depression stigma and subsequent social isolation concerns of this type have led clinicians and researchers to describe hnca as the most emotionally traumatic form of cancer it is therefore essential that clinicians charged with the care and rehabilitation of those treated for hnca actively seek to identify acknowledge and systematically address a range of physical psychological social and communication problems efforts that systematically consider this range of post treatment sequelae are seen as critical to any effort directed toward enhanced rehabilitation outcomes actively and purposefully addressing post treatment challenges may increase the likelihood of both short and long term rehabilitation success in this challenging clinical population current

information suggests that successful clinical outcomes for those with hnca are more likely to be realized when highly structured yet flexible interdisciplinary programs of care are pursued yet contemporary educational resources that focus not only on management of voice speech eating and swallowing disorders but also address issues such as shoulder dysfunction due to neck dissection the significant potential for cosmetic alterations can offer a much broader perspective on rehabilitation contemporary surgical treatment frequently involves reconstruction with extensive procedures that require donor sites that include both soft tissue from a variety of locations e g forearm thigh etc as well as bone e g the scapula collectively resources that address these issues and many other concerns and the resultant social implications of hnca and its treatment can serve to establish a comprehensive framework for clinical care consequently providing a highly specialized and comprehensive educational resource specific to hnca rehabilitation is currently needed the proposed edited book is designed to address this void in a single authoritative resource that is also accessible to the clinical readership integral to this proposed book is information that guides clinical approaches to hnca rehabilitation in addition to offering emphasis on the direct impact of changes in voice speech and swallowing and the impact of such losses on outcomes finally while several other published sources currently exist see attached list the emphasis of these books is directed either toward the identification and diagnosis of malignant disease clinical and surgical pathology associated efforts directed toward biomedical aspects of cancer and its treatment or those with a focus on a single clinical problem or approach to rehabilitation therefore the content of the proposed multi chapter text centers on delivering a systematically structured comprehensive and clinically oriented presentation on a range of topics that will provide readers at a variety of levels with a strong well integrated and empirically driven foundation to optimize the clinical care of those with hnca the primary audience for this textbook is undergraduate and graduate level students in speech language pathology as well as practitioners especially hospital based practitioners in speech language pathology other key audiences include junior and senior level otolaryngology residents and fellows translational researchers in head and neck cancer related medical specialists e g radiation oncology oncology nurses and potentially other rehabilitation professionals such as occupational therapists counseling psychologists social workers and rehabilitation counselors

Clinical Care and Rehabilitation in Head and Neck Cancer 2019-03-21

the routledge handbook of communication disorders provides an update on key issues and research in the clinical application of the speech language and hearing sciences in both children and adults focusing on areas of cutting edge research this handbook showcases what we know about communication disorders and their assessment and treatment it emphasizes the application of theory to clinical practice throughout and is arranged by the four key bases of communication impairments neural genetic bases perceptual motor bases cognitive linguistic bases socio cultural bases the handbook ends with an integrative section which looks at innovative ways of working across domains to arrive at novel assessment and treatment ideas it is an important reference work for researchers students and practitioners working in communication science and speech and language therapy

Routledge Handbook of Communication Disorders 2015-04-24

for more than 30 years the highly regarded secrets series has provided students and practitioners in all areas of health care with concise focused and engaging resources for quick reference and exam review ent secrets 5th edition offers practical up to date coverage of the full range of essential topics in this dynamic field this highly regarded resource features the secrets popular question and answer format that also includes lists tables pearls memory aids and an easy to read style making inquiry reference and review quick easy and enjoyable the proven secrets series format gives you the most return for your time succinct easy to read engaging and highly effective coverage includes the full range of topics in otolaryngology

from basic science to obstructive sleep apnea to the aging neck and face new chapters cover pharyngitis and laryngitis evaluation of hearing hearing loss and ototoxicity and cochlear implants fully revised and updated including protocols and guidelines that are continuously evolving and that increasingly dictate best practices top 100 secrets and key points boxes provide a fast overview of the secrets you must know for success in practice and on exams bulleted lists mnemonics practical tips from global leaders in the field all providing a concise overview of important board relevant content portable size makes it easy to carry with you for quick reference or review anywhere anytime

ENT Secrets 2022-05-09

oral head and neck oncology and reconstructive surgery is the first multidisciplinary text to provide readers with a system for managing adult head and neck cancers based upon stage using an evidence based approach to the management and treatment of a wide variety of clinical conditions the extensive experience of the author and contributors in head and neck surgery and oncology are highlighted throughout the text this includes computer aided surgical simulation intraoperative navigation robotic surgery endoscopic surgery microvascular reconstructive surgery molecular science and tumor immunology in addition high quality photos and illustrations are included which are easily accessible on mobile devices management protocols and outcomes assessment provide clear guidelines for managing problems related to adult head and neck oncology and reconstructive surgery state of the art guidance by recognized experts details current techniques as well as technological advances in head and neck cranio maxillofacial surgery and oncology evidence based content details the latest diagnostic and therapeutic options for treating a wide variety of clinical problems with an emphasis on surgical technique and outcomes multidisciplinary approach reflects best practices in managing head and neck oncology and cranio maxillofacial surgery 900 highly detailed images clearly demonstrate pathologies and procedures designed for the modern classroom which lets you access important information anywhere through mobile tablets and smart phones

Oral, Head and Neck Oncology and Reconstructive Surgery - E-Book 2017-08-25

scott brown s otorhinolaryngology is used the world over as the definitive reference for trainee ent surgeons audiologists and trainee head and neck surgeons as well as specialists who need detailed reliable and authoritative information on all aspects of ear nose and throat disease and treatment key points accompanied by a fully searchable electronic edition making it more accessible containing the same content as the print edition with operative videos and references linked to medline highly illustrated in colour throughout to aid understanding updated by an international team of editors and contributors evidence based guidelines will help you in your clinical practice features include key points best clinical practice guidelines details of the search strategies used to prepare the material and suggestions for future research new endocrine section scott brown will provide trainee surgeons ent and head and neck audiologists and ent physicians with quick access to relevant information about clinical conditions and provide them with a starting point for further research the accompanying electronic edition enhanced with operative videos will enable both easy reference and accessibility on the move

Scott-Brown's Otorhinolaryngology and Head and Neck Surgery, Eighth Edition 2018-07-17

motor speech disorders diagnosis and treatment fourth edition offers a detailed yet streamlined introduction to motor speech disorders for graduate

speech language pathology students and beginning clinicians the text begins with a brief historical overview of motor speech disorders providing useful context for understanding the technology and methodology used by today's speech language pathologists for assessment and treatment the book also provides a practical introduction to the human motor system with 45 full color anatomical illustrations enabling readers to more easily understand the challenging material a full chapter is dedicated to the assessment of the disorders and includes a detailed explanation of the complete motor speech examination the majority of the text is focused on the six pure dysarthrias mixed dysarthria and apraxia of speech throughout these chapters a consistent organization is maintained to facilitate the reader's understanding of the disorders each chapter begins with the neurological basis of the condition then covers the causes of the disorder an examination of the relevant speech characteristics and key evaluation tasks specific to the disorder and concludes with treatment procedures key features the author uses an uncomplicated presentation of neurological conditions with an accessible writing style chapter outlines identify the major topics discussed in each chapter a concise summary effectively wraps up each chapter to emphasize key points for students end of chapter study questions prompt review and application of topics discussed in each chapter 230 bolded key terms throughout with an end of book glossary 18 clinical cases with videos of real patients with motor speech disorders new to the fourth edition several new illustrations providing insight into how certain diseases affect the motor system new information developments related to conditions that can cause dysarthria assessment of dysarthria and apraxia of speech treatment tasks with particular focus on evidence based procedures many updated references and citations in nearly every chapter disclaimer please note that ancillary content such as eflashcards are not be included as published in the original print version of this book

Motor Speech Disorders 2023-11-09

brain computer interfaces lab experiments to real world applications the latest volume in the progress in brain research series focuses on new trends and developments this established international series examines major areas of basic and clinical research within the neurosciences as well as popular and emerging subfields explores new trends and developments in brain research enhances the literature of neuroscience by further expanding this established ongoing international series examines major areas of basic and clinical research within the field

Brain-Computer Interfaces: Lab Experiments to Real-World Applications 2016-08-27

in this issue of otolaryngologic clinics guest editors drs karen m kost and gina d jefferson bring their considerable expertise to the topic of larynx cancer top experts in the field cover key topics such as perioperative assessment prehabilitation dysplastic lesions of the larynx radiation for early glottic cancer surgical management of supraglottic cancer salvage surgery vocal rehabilitation and quality of life swallowing function after treatment of laryngeal cancer end of life care and more contains 18 relevant practice oriented topics including diagnostic assessment imaging and staging of laryngeal cancer surgical treatment of early glottic cancer surgical management of advanced glottic cancer the role of robotic surgery in laryngeal cancer reconstruction options and more provides in depth clinical reviews on larynx cancer offering actionable insights for clinical practice presents the latest information on this timely focused topic under the leadership of experienced editors in the field authors synthesize and distill the latest research and practice guidelines to create clinically significant topic based reviews

Larynx Cancer, An Issue of Otolaryngologic Clinics of North America, E-Book 2023-04-12

designed to enhance the learning experience for both practicing otolaryngologists and otolaryngology residents bailey s head neck surgery otolaryngology 6th edition delivers concise practical information in all areas of this complex field dr clark a rosen laryngology and his hand picked editorial team representing all of the sub disciplines of head neck surgery otolaryngology of drs stacey gray rhinology patrick ha head and neck surgery charles limb otology stephen park facial plastics and reconstructive surgery and gresham richter pediatric otolaryngology ensure that all content in this two volume text is current useful and evidence based each chapter has been written to increase the reader s understanding retention and ability to successfully apply information in everyday practice

Bailey's Head and Neck Surgery 2022-08-19

this portable practical reference is designed to fill the need for primary care and clinical nutrition information for nurse practitioners within various specialty areas such as adult family pediatric and acute care it addresses the fundamentals of nutritional care including nutritional assessment identifying risk factors determining nutrient requirements and selecting appropriate intervention life cycle nutrition functional elements of nutrition support pharmacologic considerations trends in nutritional care and nutritional considerations in specific disease states are also covered

Practical Aspects of Nutritional Support 2004

now with videos dysphagia following stroke third edition is a practical and easy to use resource for clinicians treating swallowing disorders in the stroke population the authors bridge the gap between academic and clinical practice with up to date research and clinical case examples throughout in addition to a thorough overview of dysphagia diagnosis and management this text focuses heavily on evaluation and management of stroke key topics include neural underpinnings of normal and disordered swallowing swallowing screening the clinical swallowing examination including cough reflex testing the expanding array of instrumental swallowing modalities and the rehabilitation of swallowing including strength training non invasive brain stimulation and skill training while geared toward practicing clinicians dysphagia following stroke is also useful for students in professional training programs new to the third edition a third author kristin gozdzikowska bring a fresh perspective as a young clinician and researcher with particular expertise in high resolution manometry and various cutting edge treatment techniquesnew larger 6 x 9 trim sizeupdated chapters on assessment to include new and emerging instrumental technologies including high resolution manometry impedance and ultrasoundupdated chapters on management to include the newly described international dysphagia diet standardization initiative new and expanded framework for rehabilitation with a shift from peripherally focused rehabilitation to neuromodulation of cortical swallowing controlnew and updated research and trends in clinical practice throughoutincludes videos this thoroughly updated and enhanced edition of dysphagia following stroke is sure to remain a valued resource for clinicians working with stroke patients in all settings disclaimer please note that ancillary content such as documents audio and video etc may not be included as published in the original print version of this book

Dysphagia Following Stroke 2019-01-24

this proceedings contains articles submitted to the fifth international conference on cognitive neurodynamics iccn2015 in iccn2015 twelve invited plenary lectures were presented by the leading scientists in their respective research fields more than 15 mini symposiums are organized by

specialists with topics covering motor control and learning dynamic coding in distributed neural circuits dynamics of firing patterns and synchronization in neuronal systems information and signal processing techniques in neurotechnology neural oscillations and synaptic plasticity in the hippocampus new perspective on model based vs model free brain process neural mechanisms of internal switching neuroinformation computation neural model and dynamics imaging human cognitive networks neuroinformatics neuroergonomics neuroengineering dynamic brain for communication visual information processing and functional imaging and neural mechanisms of language processing all articles are peer reviewed the iccn is a series conference held every two years since 2007

Advances in Cognitive Neurodynamics (V) 2016-01-29

the emphasis on cancer management in the past was based primarily on control rates from multidisciplinary input in management there has always been a recognition that one would like to achieve the best result with the least complication but never has there been any major emphasis on evidence based outcome studies nor on functional preservation and quality of life the authors of this book have dealt very effectively with the various tumor types in head and neck cancer with the experts in the field of management the contents range from epidemiology and treatment outcome treatment techniques with the potential impact on the quality of life such as dysphagia to the various options relative to high technology radiation therapy programs for management the potential for improving form and function through surgical care as an integrated part of the program is dealt with very effectively as well as the potentials for chemotherapy and the use of targeted agents have on quality of life issues the volume also addresses toxicity quality of life and techniques for prevention of adverse effects as well as the potentials for rehabilitation and supportive care the authors have clearly done an extraordinarily good job in addressing the multiplicity of problems that impact upon the functional preservation and quality of life in head and neck radiation therapy philadelphia luther w

Functional Preservation and Quality of Life in Head and Neck Radiotherapy 2009-06-12

a multidisciplinary approach to managing swallowing dysfunction in older people provides comprehensive coverage on oropharyngeal dysphagia focusing on older patient phenotypes the book provides the knowledge needed for translational researchers and professionals to aid in the detection diagnosis treatment and management of od ultimately improving patient quality of life od has been recently considered a geriatric syndrome because of its high prevalence the increase of life expectancy and the need to be managed by a multidisciplinary approach this reference takes a novel approach to od covering all aspects as a geriatric syndrome examining a complicated and multi level topic in a succinct way contents include the most innovative information available in current literature combined with practical applications to improve the diagnosis and treatments of od as a geriatric syndrome this is the perfect reference for translational researchers physicians and healthcare professionals dealing with od presents full coverage of swallowing impairments in the older population and oropharyngeal dysphagia as a newly defined geriatric syndrome explores the latest innovations and research in the field for pathophysiology diagnosis ethics treatment and potential complications expertly written chapters by international leading experts in the fields of dysphagia and geriatric medicine are included

Head and Neck Cancer 2014-07-15

manual of diagnostic and therapeutic techniques for disorders of deglutition is the first in class comprehensive multidisciplinary text to encompass the entire field of deglutition the book is designed to serve as a treasured reference of diagnostics and therapeutics for swallowing clinicians from

such diverse backgrounds as gastroenterology speech language pathology otolaryngology rehabilitation medicine radiology and others manual of diagnostic and therapeutic techniques for disorders of deglutition brings together up to date information on state of the art diagnostic and therapeutic modalities form disciplines of gastroenterology speech language pathology otolaryngology and radiology through contributions of 28 innovators and master clinicians for the benefit of patients and providers alike it concisely organizes the wealth of knowledge that exists in each of the contributing disciplines into one comprehensive information platform manual of diagnostic and therapeutic techniques for disorders of deglutition provides a one stop destination for members of all specialties to obtain state of the knowledge information on advanced diagnostic modalities and management it is an essential reference for all deglutologists

A Multidisciplinary Approach to Managing Swallowing Dysfunction in Older People **2024-03-29**

the second edition of this well received book provides a comprehensive and up to date description of the diagnosis and management of dysphagia including oral pharyngeal and esophageal dysfunction all aspects of dysphagia are covered with detailed consideration of anatomy physiology and pathology in addition to a variety of benign and malignant disease entities signs and symptoms and treatment approaches many other relevant topics are addressed including endoscopy manometry malnutrition dehydration oral care dementia ethics and the social and psychologic impacts of dysphagia specific aspects of importance in pediatric and geriatric patients are highlighted this edition features a number of completely new chapters focusing on among other subjects dysphagia in further disease contexts and following laryngectomy and radiation therapy the authors are without exception world leading experts in their fields the book will be of value for practitioners in all specialties involved in the evaluation and treatment of dysphagia it is therefore a truly multidisciplinary project

Manual of Diagnostic and Therapeutic Techniques for Disorders of Deglutition **2012-09-12**

geriatric rehabilitation addresses the fact that this is an age in which individuals have increasing longevity better health care education and expectations of health care which present new increasing and even radical challenges to health care providers the care of our older patients in rehabilitation settings demands the broad understanding of the key differences in strategies to care for older adults the combined skills embraced in rehabilitation and geriatrics are presenting unprecedented opportunities for both fields to make substantive and even ground breaking improvements in the lives of millions of older adults who entrust their lives to us rarely in one s medical career are such opportunities so evident and achievable geriatric rehabilitation edited by dr k rao poduri md faapmr draws on a distinguished group of authors who are the front line providers of care to the older adults this book presents the full spectrum of the unique care needs of older patients who need the combined skills of physical medicine and geriatrics it provides an easily accessible means of acquiring and improving these new skills for all those involved in geriatric care
