this book offers a new contribution to the debate concerning the acquisition of the syntax discourse interface it provides evidence that children acquiring european portuguese have a very early ability to spontaneously produce vp ellipsis as answers to yes no questions it is also argued that the distribution of vp ellipsis in european portuguese including its co existence with null complement anaphora supports the hypothesis that the identification condition on ellipsis is derivable from some innate knowledge of the syntax discourse interface answers to yes no questions also provide evidence concerning children s interpretation of questions containing a cleft or the operator só only the analysis of spontaneous production is complemented by a comprehension experiment showing that children have two problems in the interpretation of these questions i they do not understand that the cleft and só introduce a presupposition and ii they start with a default focus assignment strategy and may not access other focus interpretations
