handbook of hazardous materials is a one volume compendium of hazardous materials that discusses the toxic effects of these materials on human health and the global environment it provides comprehensive coverage of individual toxic elements covers hazardous material groups and includes

more general articles such as evaluation and testing of carcinogens transport of pollutants and inhalation toxicology the fully referenced articles are presented in alphabetical order the book features a subject index as well as numerous cross references individual articles are preceded by a topical outline and discuss the origin prevalence mechanisms of toxicity and damaging effects of each hazardous material comprehensive coverage of individual toxic elements including asbestos lead mercury coverage of hazardous material groups such as pesticides food additives nitrogen compounds more general articles such as evaluation and testing of carcinogen transport of pollutants inhalation toxicology
