together with a list of auxiliary and cooperating societies their officers and other data tables of spectral lines of neutral and ionized atoms was first published in moscow in 1966 all misprints and errors that have come to our attention have been corrected and additions based on journal articles have been made for the plenum press edition in particular additions have been made in the tables for li 4 c i 1 n i 1 n iv 12 and n v 14 such highly important spectra as those of n iv nv 0 iv 0 v and 0 vi in the visible and partially in the ultraviolet regions have until recently received almost no attention in the laboratory the tables of these spectra include astrophysical data from b edlen z astrophys 7 378 1933 and c e moore a multiplet table of astrophysical interest part i n b s 1945 with rather rough estimates of the wavelengths of the spectral lines but as the spectra of highly ionized atoms have been studied in the laboratory these values have been determined more precisely and we have striven to incorporate them in the american edition of the book for the spectra of n iv and nv we have employed the recent comprehensive papers of r hallin arkiv for fysik 32 201 1966 31 511 1966 in which the system of energy levels was refined and expanded and many classified lines in the visible ordinary ultra violet and vacuum ultraviolet regions are cited reprint of the original the publishing house anatiposi publishes historical books as reprints due to their age these books may have missing pages or inferior quality our aim is to preserve these books and make them available to the public so that they do not get lost this volume continues documenting the well known excavations at morgantina a greek town in central sicily in a presentation of the largest body of coins ever unearthed at an italian site and published as a group the excavations conducted by princeton university the university of illinois and the university of virginia between 1955 and 1981 produced nearly 10 000 identifiable coins most of them at of sicilian greek and roman issues struck before the end of the first century b c the numismatic evidence not only made possible the initial identification fo the side as morgantina but has subsequently opened the way to reconstructing the history of early roman republican coinage and the bronze coinage of greek sicily the catalogue presents a full list of the coins found at morgantina through the 1981 season with discussion of significant issues and illustrations of 679 specimens a completed corpus and study of the coins struck at morgantina is also included theodore v buttrey is professor emeritus of classical studies at the university of michigan kenan t erim is professor of classical archaeology at new york university thomas d groves is a graduate student in the department of classical archaeology at princeton university r ross holloway is professor of classical archaeology at brown university originally published in 1990 the princeton legacy library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of princeton university press these editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions the goal of the princeton legacy library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by princeton university press since its founding in 1905 1850 1931 v 1 40 include reports and papers of the yorkshire architectural and york archaeological society and some years of the worcestershire archaeological society of the leicestershire archaeological society and of other similar societies when many particles come together how do they organize themselves and what destroys this organization combining experiments and theory this book describes intriguing quantum phases metals superconductors and insulators and transitions between them it captures the excitement and the controversies on topics at the forefront of research official organ of the book trade of the united kingdom the royal inscription of esarhaddon king of assyria 680 669 bc is the inaugural volume of the royal inscriptions of the neo assyrian period project the volume provides reliable up to date editions of all of the known royal inscriptions of esarhaddon a son of sennacherib who ruled assyria for twelve years 680 669 bc editions of 143 firmly identifiable texts which mostly describe successful battles and the completion of building projects all done ad maiorem gloriam deorum 29 poorly preserved late neo assyrian inscriptions that may be attributed to him and 10 inscriptions commissioned by his mother naqia zakutu and his wife esharra hammat are included to make this corpus more user friendly to both specialist and laymen each text edition with its english translation is supplied with a brief introduction containing general information a catalogue containing basic information about all exemplars a commentary containing further technical information and notes and a comprehensive bibliography arranged chronologically from earliest to latest the volume also includes 1 a general introduction to the reign of esarhaddon the corpus of inscriptions previous studies and dating and chronology 2 translations of the relevant passages of three mesopotamian chronicles 3 19 photographs of objects inscribed with texts of esarhaddon 4 indexes of museum and excavation numbers and selected publications and 5 indexes of proper names personal names geographic

ethnic and tribal names divine planet and star names gate palace temple and wall names and object names the book is accompanied by a cd rom containing transliterations of selected inscriptions arranged in a musical score format the royal inscriptions of the neo assyrian period rinap series will present up to date editions of the royal inscriptions of a number of late neo assyrian rulers beginning with tiglath pileser iii 744 727 bc this new series is modeled on the publications of the now defunct royal inscriptions of mesopotamia rim series and will carry on where its rima royal inscriptions of mesopotamia assyrian periods publications ended the project is under the direction of g frame university of pennsylvania and is supported by the national endowment for the humanities reprint of the original first published in 1875 providing a complete foundation to comprehend the physics of the microworld advanced particle physics two volume set develops the models theoretical framework and mathematical tools to understand current experiments and make predictions for future experiments the set brings together a vast array of topics in modern particle physics and distill
