my first encounter with acronyms took place when i was ten years old and growing up in an occupied cowltry during the second world war my father proudly annownced one day that despite the ban imposed by the occupying administration he had managed to get a radio installed and could receive the bbc all acronyms used in this introduction are listed in this dictionary to me the meaning of bbc was that we would receive different information about the war than we got from the usual censored broadcasts there was of course the well known acronym associated with the nt but at that time i did not realize that it meant more than the postal service in those years a deteriorated service gradually the daily use of acronyms grew most of the newly acquired three and four letter abbreviations referred to organiza tions such as the broadcasting corporations in the netherlands and belgium and references to cowltries such as the usa ussr and uk when attending high school the hbs after the war my knowledge of acronyms grew slowly even during the ten years as i spent in the

this compilation probably looks like one of the craziest things a human being could spend his or her time on yet nobody would wonder at someone taking a short walk every day after twenty five years that person would have covered a surprisingly long distance this is exactly the story behind this list which appeared first as a few pages within the directory starguides or whatever name it had at that time and as a distinct sister publication since 1990 the idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations acronyms contractions and symbols which they might encounter in all aspects of the vast range of their professional activities including traveling perhaps it is a bit paradoxical but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline they will probably encounter more difficulties when dealing with adjacent fields it is for this purpose that this dictionary might be most often used scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions
