designing for the climate emergency and designing for a world after a pandemic both seek to make the world a safer happier and more resilient place written by set of contributing design experts this book is for all architects whether sole practitioners or working in a larger practice as well as inspirational design guidance it also provides client perspectives crucial for understanding how clients are planning for the future too the finest spa in bangkok the most spectacular resort island in the maldives the hottest club in beirut the hippest hotel in new york the most exclusive boutique in paris the best restaurant in berlin the newest museum in tokyo and the coolest plaza in barcelona all these and more are described in lush detail in design destinations worldwide a collection of the most spectacular most exclusive and hottest places on the planet around the globe new shops spas bars restaurants and hotels are being established or with tremendous fantasy and sparing no expense are being interpreted in new ways their creation involves not only architects but also inspired interior decorators artists and fashion designers these teams strive to meet the increasingly high standards of self confident clients they are the wellspring of creative trends never at rest and always thrilling the design destinations gathered in this book are the interstices of public life generating ambiance that is both a gesture of hospitality and a means of connecting with others architecture is increasingly understood to be a sensual spatial experience which means that the experience of buildings and spatial constellations is also a perception of atmospheres that are rated as positive or negative architects planners investors and politicians must produce effects such as these according to intersubjective and communicable criteria and not intuitively or randomly architectural atmospheres addresses the growing awareness of the atmospheric dimension of architecture and provides a current programmatic discussion of this topic what possibilities does this approach open to architecture what value does this knowledge have three essays and a conversation lead a cross discipline discussion on the impact of architecture and contribute to the debate first initiated by peter zumthor the texts are accompanied by thirty five color images that capture architectural moods in a variety of ways gernot böhme is professor emeritus of philosophy at darmstadt technical university and director of the institute for practical philosophy e v ipph in darmstadt germany christian borch is professor of political sociology at the department of management politics and philosophy copenhagen business school denmark olafur eliasson is a danish icelandic artist eliasson incessantly explores our modes of perceiving his work spans photography installation sculpture and film juhani pallasmaa is one of finland s most distinguished architects and architectural thinkers the 1915 16 panama california exposition celebrated the opening of the panama canal and first introduced the city of san diego to a wider international audience balboa park became the featured centerpiece the core park layout today remains essentially the same as during the original fair later constructed buildings and venues have expanded the variety of attractions the majority of buildings introduced during the first exposition outside of the california quadrangle were temporary by intent constructed in wood and plaster most of these remained standing for nearly eighty years even during a subsequent fair in 1935 36 eventually each of these structures would be demolished and reconstructed with sturdier materials the fresher building designs remained identical to the previous temporary structures integrated throughout the initial exposition design were a variety of european architectural styles for southern california spectators this diverse assortment would result in popularizing spanish renaissance styling throughout the region decades of similarly themed constructions followed and dominated the region s architecture it is not an extended stretch to suggest the genesis of contemporary california style had its birth from the exposition balboa park architecture is an extensive photographic survey of the structures introduced during the 1915 16 panama california exposition escorts the reader through an intimate tour of the al prado pedestrian walkway traditional thai massage yoga and breathwork for healing and spiritual harmony

bridge to the sea evenson fountain detailed images of exterior building finishes and the structures offer an insightful glimpse of lead architect bertram goodhue s vision goodhue is credited with introducing a wider american audience to the traditional spanish baroque and spanish colonial styles of architecture blending these influences with italian churrigueresque style he fashioned a hybrid that would become known as the spanish colonial revival form this fusion became a dominant theme within the el prado quadrangle s layout during the 1915 16 panama california exposition in balboa park the exposure and success of exposition became a highly influential factor in the development of a distinct southern california style of architecture the spanish colonial revival style became the predominant design in the rebuilding of santa barbara following a devastating 1925 earthquake the style remains prevalent throughout california and the southwestern united states following the exposition goodhue s creations became increasingly freed of architectural detail and considered more romanesque in form he worked towards a more synthesized and simplistic design many credit as paving the next phase of architectural idioms where this direction may have evolved was abruptly terminated upon his premature death goodhue died abruptly at the age of 54 in new york city he was buried within a wall vault at his church of the intercession in manhattan on the border of the harlem and washington heights neighborhoods sculptor lee lawrie created a gothic stylized tomb for him the thesis locates shelter and hospitality at architecture s core tactical interventions along dubai s main highway offer the other respite from the inhospitable desert city in the city of foreigners expats are welcomed while laborers toil under harsh conditions by reinterpreting the majlis the traditional space of hospitality in the arabian house new majlis at the scale of the city serve to suspend host guest hierarchies they utilize the common ground of the highway and reclaim the liminal space of the interchange using shade surface and ecology these majlis even in their polluted temporal states attempt to grant the other place and visibility perhaps even dignity and power this internationally significant book analyzes architectural elements drawing general principles from the prevailing pluralism of architectural approaches von meiss expertly bridges the gap between history and contemporary work by pinpointing the constant factors that exist in all architecture a comprehensive analysis of the whole architectural phenomenon this valuable book will prove especially useful to modern practitioners who need to make constant reference to buildings of the past staying away from the ineffectual arguments on styles that dominate today s architectural literature this is the first recent book to attempt such a synthesis of architectural history and contemporary work as such it is unique judging from the debates taking place in both education and practice it appears that architecture is deeply in crisis new design and production techniques together with the globalization of capital and even skilled labour have reduced architecture to a commodified object its aesthetic qualities tapping into the current pervasive desire for the spectacular these developments have changed the architect s role in the design and production processes of architecture bringing together essays and interviews from leading scholars such as kenneth frampton peggy deamer bernard tschumi donald kunze and marco biraghi this volume investigates and critically addresses various dimensions of the present crisis of architecture

Building Type Basics for Hospitality Facilities 2001-08-13 publisher description

Ethics in the Real Estate and Hospitality Industry (Volume 1 - Architectural, Interior Design and MEP Services) 2022-05-08 architecture is increasingly understood to be a sensual spatial experience which means that the experience of buildings and spatial constellations is also a perception of atmospheres that are rated as positive or negative architects planners investors and politicians must produce effects such as these according to intersubjective and communicable criteria and not intuitively or randomly architectural atmospheres addresses the growing awareness of the atmospheric dimension of architecture and provides a current programmatic discussion of this topic what possibilities does this approach open to architecture what value does this knowledge have three essays and a conversation lead a cross discipline discussion on the impact of architecture and contribute to the debate first initiated by peter zumthor the texts are accompanied by thirty five color images that capture architectural moods in a

variety of ways gernot böhme is professor emeritus of philosophy at darmstadt technical university and director of the institute for practical philosophy e v ipph in darmstadt germany christian borch is professor of political sociology at the department of management politics and philosophy copenhagen business school denmark olafur eliasson is a danish icelandic artist eliasson incessantly explores our modes of perceiving his work spans photography installation sculpture and film juhani pallasmaa is one of finland s most distinguished architects and architectural thinkers

The Hospitality and Leisure Architecture of Wimberly Allison Tong and Goo 1997 the 1915 16 panama california exposition celebrated the opening of the panama canal and first introduced the city of san diego to a wider international audience balboa park became the featured centerpiece the core park layout today remains essentially the same as during the original fair later constructed buildings and venues have expanded the variety of attractions the majority of buildings introduced during the first exposition outside of the california quadrangle were temporary by intent constructed in wood and plaster most of these remained standing for nearly eighty years even during a subsequent fair in 1935 36 eventually each of these structures would be demolished and reconstructed with sturdier materials the fresher building designs remained identical to the previous temporary structures integrated throughout the initial exposition design were a variety of european architectural styles for southern california spectators this diverse assortment would result in popularizing spanish renaissance styling throughout the region decades of similarly themed constructions followed and dominated the region s architecture it is not an extended stretch to suggest the genesis of contemporary california style had its birth from the exposition balboa park architecture is an extensive photographic survey of the structures introduced during the 1915 16 exposition the edition escorts the reader through an intimate tour of the el prado pedestrian walkway from the current laurel street bridge to the bea evenson fountain detailed images of exterior building finishes and the structures offer an insightful glimpse of lead architect bertram goodhue s vision goodhue is credited with introducing a wider american audience to the traditional spanish baroque and spanish colonial styles of architecture blending these influences with italian churrigueresque style he fashioned a hybrid that would become known as the spanish colonial revival form this fusion became a dominant theme within the el prado quadrangle s layout during the 1915 16 panama california exposition in balboa park the exposure and success of exposition became a highly influential factor in the development of a distinct southern california style of architecture the spanish colonial revival style became the predominant design in the rebuilding of santa barbara following a devastating 1925 earthquake the style remains prevalent throughout california and the southwestern united states following the exposition goodhue s creations became increasingly freed of architectural detail and considered more romanesque in form he worked towards a more synthesized and simplistic design many credit as paving the next phase of architectural idioms where this direction may have evolved was abruptly terminated upon his premature death goodhue died abruptly at the age of 54 in new york city he was buried within a wall vault at his church of the intercession in manhattan on the border of the harlem and washington heights neighborhoods sculptor lee lawrie created a gothic stylized tomb for him

Proceedings of the 2nd International Joint Conference on Hospitality and Tourism, IJCHT 2022, 6-7 October 2022, Singaraja, Bali, Indonesia 2022-12-12 the thesis locates shelter and hospitality at architecture s core tactical interventions along dubai s main highway offer the other respite from the inhospitable desert city in the city of foreigners expats are welcomed while laborers toil under harsh conditions by reinterpreting the majlis the traditional space of hospitality in the arabian house new majlis at the scale of the city serve to suspend host guest

hierarchies they utilize the common ground of the highway and reclaim the liminal space of the interchange using shade surface and ecology these majlis even in their polluted temporal states attempt to grant the other place and visibility perhaps even dignity and power

RETHINK Design Guide 2021-02-18 this internationally significant book analyzes architectural elements drawing general principles from the prevailing pluralism of architectural approaches von meiss expertly bridges the gap between history and contemporary work by pinpointing the constant factors that exist in all architecture a comprehensive analysis of the whole architectural phenomenon this valuable book will prove especially useful to modern practitioners who need to make constant reference to buildings of the past staying away from the ineffectual arguments on styles that dominate today s architectural literature this is the first recent book to attempt such a synthesis of architectural history and contemporary work as such it is unique

Design Destinations Worldwide 2008-06 judging from the debates taking place in both education and practice it appears that architecture is deeply in crisis new design and production techniques together with the globalization of capital and even skilled labour have reduced architecture to a commodified object its aesthetic qualities tapping into the current pervasive desire for the spectacular these developments have changed the architect s role in the design and production processes of architecture bringing together essays and interviews from leading scholars such as kenneth frampton peggy deamer bernard tschumi donald kunze and marco biraghi this volume investigates and critically addresses various dimensions of the present crisis of architecture
