Periodic table riddle answer: The element with atomic number 11 is sodium (Na). It is a soft, silvery metal that reacts with water to form sodium hydroxide and hydrogen gas.

Periodic table riddle answer: The element with atomic number 12 is magnesium (Mg). It is a silvery metal that reacts with water to form magnesium hydroxide and hydrogen gas.

Periodic table riddle answer: The element with atomic number 19 is potassium (K). It is a soft, silvery metal that reacts with water to form potassium hydroxide and hydrogen gas. It is also the most reactive metal in the periodic table.

Periodic table riddle answer: The element with atomic number 20 is calcium (Ca). It is a silvery metal that reacts with water to form calcium hydroxide and hydrogen gas. It is also the most reactive metal in the periodic table.

Periodic table riddle answer: The element with atomic number 21 is scandium (Sc). It is a silvery metal that reacts with water to form scandium hydroxide and hydrogen gas. It is also the most reactive metal in the periodic table.

Periodic table riddle answer: The element with atomic number 22 is titanium (Ti). It is a silvery metal that reacts with water to form titanium hydroxide and hydrogen gas. It is also the most reactive metal in the periodic table.

Periodic table riddle answer: The element with atomic number 23 is vanadium (V). It is a silvery metal that reacts with water to form vanadium hydroxide and hydrogen gas. It is also the most reactive metal in the periodic table.

Periodic table riddle 2006-01: The element with the highest atomic number is Oganesson (Og), with an atomic number of 118. It is a synthetic element and is highly unstable, with a half-life of only a few milliseconds. It is located in the 7th period and 18th group of the periodic table.

Periodic table riddle 1999-06-01 1902: The element with the highest atomic number is Oganesson (Og), with an atomic number of 118. It is a synthetic element and is highly unstable, with a half-life of only a few milliseconds. It is located in the 7th period and 18th group of the periodic table.

Periodic table riddle 2000-08-31: The element with the highest atomic number is Oganesson (Og), with an atomic number of 118. It is a synthetic element and is highly unstable, with a half-life of only a few milliseconds. It is located in the 7th period and 18th group of the periodic table.

Periodic table riddle 1992: The element with the highest atomic number is Oganesson (Og), with an atomic number of 118. It is a synthetic element and is highly unstable, with a half-life of only a few milliseconds. It is located in the 7th period and 18th group of the periodic table.

Periodic table riddle 2018-02: The element with the highest atomic number is Oganesson (Og), with an atomic number of 118. It is a synthetic element and is highly unstable, with a half-life of only a few milliseconds. It is located in the 7th period and 18th group of the periodic table.

Periodic table riddle 1981: The element with the highest atomic number is Oganesson (Og), with an atomic number of 118. It is a synthetic element and is highly unstable, with a half-life of only a few milliseconds. It is located in the 7th period and 18th group of the periodic table.

Periodic table riddle 1952-07-30: The element with the highest atomic number is Oganesson (Og), with an atomic number of 118. It is a synthetic element and is highly unstable, with a half-life of only a few milliseconds. It is located in the 7th period and 18th group of the periodic table.

Periodic table riddle 2002-10-16: The element with the highest atomic number is Oganesson (Og), with an atomic number of 118. It is a synthetic element and is highly unstable, with a half-life of only a few milliseconds. It is located in the 7th period and 18th group of the periodic table.

Periodic table riddle 2020-02-20: The element with the highest atomic number is Oganesson (Og), with an atomic number of 118. It is a synthetic element and is highly unstable, with a half-life of only a few milliseconds. It is located in the 7th period and 18th group of the periodic table.
