this fresh analysis of the england australia e bodyline controversy e of 1932 33 uncovers hypocrisy on both sides of the furore drawing on exclusive interviews with english e villain of the piece e and australian emigre harold larwood at the time australia was a young isolated country where sport was a religion winning essential and the media prone to distortion in england the mcc was pressurised by a british government fearing trade repercussions leaving harold larwood and douglas jardine to be hung out to dry on a clothes line of political expediency the bodyline hypocrisy analyzes the influence of australian culture on events and on exaggerations and distortions previously accepted as fact it reveals that the mcc granted honorary membership to larwood in 1949 influenced by its australian president and now even ian chappell has stated that jardine s leg theory tactic was simply playing test cricket with whatever weapons were available times change and the truth emerges

cricket matches didn t always top out at five days regardless of a result or not they used to be timeless with play continuing until one team won no matter how many days that took the last of these which took place in durban in 1939 in a series pitched against the backdrop of impending war is now universally acknowledged as the timeless test weighing in at a prodigious ten days the match stretched from 3 14 march 1939 and allowed for two rest days while one day s play the eighth was lost entirely to rain it is quite simply the longest test ever played a litany of records also perished in its wake and whole pages of wisden were ruthlessly made obsolete if that was not enough one player the

years he was the best spin bowler in the world the story of jack iverson is one of the most remarkable in the history of cricket every now and then wrote one journalist there comes a man who can do the right thing the wrong way round iverson took up cricket at the advanced age of 31 as capriciously as he left it joining a club 3rd xi in melbourne one day and instantly announcing himself as the most prodigious and improbable spinner of a cricket ball using a unique technique he appears to have perfected with a ping pong ball during wartime service in papua new guinea he doubled back his middle finger and found he could bowl leg breaks top spinners and googlies every one dropped on a perfect length and impossible to pick within four years he was bowling the australian test side to victory over england in the ashes series of 1950 51 then in his moment of triumph he retired from international cricket and was never the same bowler again mystery spinner is more than that beautifully written life of an elusive and forgotten hero who after his brief burst of celebrity has left strangely little trace in posterity it is also the utterly compelling story of gideon haigh s quest to solve the enduring riddle of jack iverson s life a quest which led him across australia following tenuous clues in school registers and county records and above all it is a moving study for an age that presumes sporting prowess to be the ultimate definition of personal identity of how skill is only half the battle in sport and how it takes an extraordinary individual to cope successfully with extraordinary achievement

concepts concerning cell fine structure these structural perspectives are now being integrated with specific functional biochemical and pathophysiological events and processes of cells and tissues most recently utilization of innovative electron microscopic techniques such as freeze fracture freeze etching and scanning and high voltage electron microscopy offers both the basic and clinical scientist potentially fundamental insights into many morphodynamic processes related to the activities of cells and tissues such an approach has been especially rewarding when applied to the dynamic events of gametogenesis and early embryonic development the chapters comprising this book have been selected and edited with the aim of providing an up to date and comprehensive account of the most important aspects of vertebrate gametes and embryos as revealed by the integration of several different submicroscopic methods the organization of the chapters is designed to indicate present gaps in our knowledge of the developmental and reproductive biology of gametes and the developing embryo and possible lines of research which may lead to a lessening of these gaps

since victorian times the mcc had embraced the amateur ideal that cricket was more than a game it was the very essence of camaraderie and good sportsmanship yet for all their evangelising

~~the game's privileged elite were part of a british establishment~~
which revelled in its national prestige and imperial hegemony and winning at cricket was essential to maintaining that stature ambassadors of goodwill assesses the mcc's attempt to marry these conflicting objectives and foster goodwill within the empire via long formal overseas tours after the war the amateur ideal suffered when len hutton was appointed england's first professional captain his uncompromising leadership brought success on the field but discord off it managers were installed to restore diplomatic harmony but with the growing upheavals of the late 60s cricket became increasingly associated with nationality race and professional cynicism ray illingworth's controversial win in australia in 1970-71 clearly signalled the mcc's waning influence
