Paper Regulations Made by the Secretary of Agriculture with the Approval of the President Under the Agricultural Adjustment Act 1933

excerpt from agriculture in japan a paper read by professor koide before the agricultural section of the royal society 11th june 1918 besides these chief islands there are about 600 small islands not deserving of mention it was called in ancient time oyashima in japanese that means great eight islands japan extends for about 2 100 miles with a width of 200 miles at her widest part and is a very mountainous country there is a solid backbone of mountains running through each of the chief islands we count six mounts which are over 10 000 feet high and nine over 9 000 feet so a great portion of the whole area is taken up by the mountains which can never be utilised for agriculture the mountains form a divide or watershed in each island so rivers which flow down on both sides are mostly short and rapid though numerous of the areas unoccupied by mountains hills rivers or lakes about 70 per cent are taken by upland and 30 per cent by low plains the uplands are mostly on the skirts of volcanic mountains they are generally covered with grass among which grow several varieties of lilies and other flowering herbs they present a gay aspect but are not much used for agriculture low plains are distributed along the courses of rivers everywhere and there all sorts of agriculture are carried on every corner of land being used as far as possible to the utmost degree climate japan is much elongated from north to south almost reaching to the frigid zone and the tropical zone at each end and the country is also influenced much by the cold current of the okhotsk sea in the north and a warm current in the south a great variation of climate is a matter of course but with the exception of the two extremities japan proper lies within the temperate zone i can say with all confidence that we enjoy both in temperature and humidity practically the golden mean about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Agricultural Research and Development 1975

d gale johnson one of the world s foremost agricultural economists has over the last five decades changed the conduct of research on agricultural economics and policy the papers brought together in the economics of agriculture reveal the breadth and depth of his influence on the creation of modern agricultural economics volume 1 collects for the first time in one source johnson s most important work these classic papers explore the consequences of government intervention in united states and world agriculture the economics of agricultural supply and of rural labor and human capital issues and the analysis of agricultural productivity in poor countries including the centrally planned economies of china and eastern europe models of precise reasoning and powerful empirical research the papers cover a wide range of topics from u s commodity price policy to the economics of population control and farm policy reform in china volume 1 includes a definitive bibliography of johnson s published writings volume 2 presents twenty two papers by johnson s former students and colleagues international in scope these papers explore themes and topics inspired by johnson s work including agricultural policy and u s farm prices european common agricultural policy and agricultural and rural development in the third world contributors to volume 2 are david g abler john m antle richard r barichello andrew p barkley karen brooks david s bullock robert e evenson b delworth gardner bruce l gardner dale m hoover wallace e huffman paul r johnson yoav kislev justin yifu lin yair mundlak john nash keijuro otsuka willis peterson todd e petzel vernon w ruttan maurice schiff g edward schuh theodore w schultz james snyder vasant sukhatme daniel a sumner vinod thomas george toley and alberto valdes

List of Available Publications of the United States Department of Agriculture 1993

the green revolution in india about 50 years ago transformed india s image then as begging bowl to bread basket this transformation during the 1960s took just about 4 years the yield increases achieved in wheat and then in rice which occurred in just about half decade is far in excess of the yield increases during the preceding 4000 years this remarkable feat was achieved with the leadership of the author using the dwarf wheat types which had been produced by norman borlaug in mexico the

research and development of green revolution of wheat and rice at the indian agricultural research institute new delhi was led by the author along with his team of students and co workers he has published over 100 papers on green revolution and the ever green revolution which is a refinement of the former this book is a compilation of just about 40 of his numerous research papers monographs and books published by him on this subject the papers in this book bring out the scientific basis of the modification of the plant type so as to be responsive to exogenous addition of chemical fertilizers and irrigation the ideal plant type enables capture of adequate sunlight and using the chemical fertilizers added to the soil produce substantial photosynthetic starch and because the plants have short and thick culm they are able to withstand enormous amounts of grains in their ears this indeed was the basis of breaking the yield barriers associated with native varieties the book also brings out that green revolution had established the food security at the national level but not at the individual household levels of millions of resource poor rural small and marginal farming fishing and landless families further green revolution was commodity centric and the manner of its practice led to environmental degradation and social inequities this author realized as early as 1972 that system of agriculture in india should be designed to fight both the famines of food and rural livelihoods in pursuit of it this author further designed an evergreen revolution with systems approach what this means is providing concurrent attention to ecological foundations of agriculture and the livelihoods of the rural people the book also brings out that green revolution was a team effort involving scientists policy makers administrators farmers and students this book is an outstanding example of green revolution providing a breathing space by putting the cereal grain production rate ahead of the population growth rate and then when food security has been adequately established the system is changed to achieve productivity in perpetuity without causing environmental and social harm

Occasional Paper – Department of Agricultural Economics, New York State College of Agriculture and Life Sciences 1984-12

this paper explains the approach the agency is taking toward development assistance in the field of agriculture from the shaping of broad policy to the specifics of project delivery it outlines the main objectives of food self reliance local participation and beneficial economic relations and details strategies being used to reach those goals

Farm Paper Letter 2015-06-16

this title was first published in 2002 this volume represents some of the proceedings of the 24th conference of the international association of agricultural economists iaee held in berlin germany in august 2000 the papers in this volume include the president s address the elmhirst lecture and a selection of 20 contributed papers it also includes panel discussion reports reports on the discussion groups and mini symposia poster paper abstracts and the synoptic view presented at the close of the conference by the new president of the iaee joachim von braun the theme of the 24th conference was tomorrow s agriculture incentives institutions infrastructure and innovations reflecting the rapid advances being made in the application of biotechnology in both the developed and developing worlds

this work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it this work was reproduced from the original artifact and remains as true to the original work as possible therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work this work is in the public domain in the united states of america and possibly other nations within the united states you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work as a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public we appreciate your support of the preservation process and thank you for being an important part

of keeping this knowledge alive and relevant

50 Years of Green Revolution 1977

the edited book has been prepared through collection of precious research articles from eminent extension scientists which have contributed papers on institutional arrangements for technology delivery innovative extension approaches break through methodologies in extension research the reach and effectiveness of ict tools in technology delivery youth and gender inclusive extension strategies and extension strategies for changing scenario of agriculture papers in this book would definitely make an impact among extension scientists and post graduate scholars of extension in agriculture veterinary and fishery sciences the inputs that this book offers will be of much helpful to the researchers administrators and policy makers from the research findings of the selected research papers of this book the extension researchers can sharpen their future research strategies the extension administrators and policy makers in the government can get to know about the impact and constraints of several institutional mechanisms of technology delivery which will facilitate them in evidence based policy making

Green Paper on Planning for Agriculture 1968

this book is intended as a text for undergraduate students of agriculture it is useful to research scholars and other professionals in the field of agriculture development and management especially under teaching stream introductory agronomy involves several basic subjects like agronomy soil and water farm machinery entomology engineering soil science and plant breeding and genetics etc for an integrated development and management of agriculture knowledge of all these subjects are necessary for undergraduate students a sincere attempt is made to provide such prospective to the students a fundamental knowledge of identification of crops seeds weeds fertilizers and plant protection chemicals water quality analysis and measurement will be needed in crop planning under different situations therefore an attempt has been to present the topics relevant to the needs of the agronomy thus book is therefore designed to fulfill the need for students of agriculture and serves as reference tool for the teachers in the field of agronomy from all points of view

FAO Agricultural Development Paper 2002

agri food production remains vital to the economies in latin america and the caribbean lac food systems are rapidly changing and are driven by income growth urban population growth shifts in dietary preferences and agricultural productivity growth food systems are also under threat from disrupters like climate change and distorting policies including trade wars this paper makes two quantitative forward looking assessments for the future of food and agriculture in the lac region the first focuses on the long term prospects given projected pathways for the main drivers and under the threat of climate change the second focuses on current vulnerability of lacs agri food system to short term disrupters with special reference to impacts of global trade wars and the prospects for reducing that vulnerability the implications are not uniform across the countries in the region but vary greatly depending on economic and demographic size contribution of the agricultural sector to national gdp natural resource endowments ecological and climatic characteristics level of sophistication of rural and agrarian institutions available technology farm size distribution and tenure systems policy interventions to address the challenges will need to consider those differences in initial conditions the foresight assessments are built on ifpri s core global model frameworks impact and miragrodep they allow to capture the complexity of agri food system development and the scenario analysis helps quantify the relative importance of the drivers and disruptors of food system change which in turn should be of essential to policymakers in setting priorities for steering towards sustainable and stable food systems capable of meeting twenty first century challenges

Better Livelihoods for Poor People 1981

a collection of scientific papers and essays on agricultural topics including soil chemistry plant breeding animal husbandry and crop rotation written by leading experts of the day these papers offer valuable insights into the practical application of scientific principles in agriculture this work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it this work is in the public domain in the united states of america and possibly other nations within the

united states you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public we appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant

Tanzanian Farming System Project Paper 1909

this paper assesses the nature of agricultural transformation taking place in different parts of africa and analyzes policy drivers of the transformation using data from the caadp biennial review br on 46 indicators from 2014 to 2018 first a typology of agriculture transformation in different groups of countries is developed by analyzing the initial values and trends in three indicators share of agriculture in total employment share of agriculture in gross domestic product and agriculture labor productivity the typology in addition to a conceptual framework that is developed for measuring the relative effect of a policy on an outcome provides the basis for analyzing the policy drivers of agriculture transformation the 46 br indicators are classified into policies 13 indicators intermediate results 23 indicators and outcomes 10 indicators and then econometric methods are used to measure the association between the policy indicators and the intermediate results and outcomes which include agriculture intensification e g access to finance and extension fertilizer use and irrigation development agriculture growth agriculture trade food security nutrition and poverty different fixed effects regression methods and model specifications of the explanatory variables are used to assess sensitivity of the results to different assumptions of the data and the relationship between the policies and intermediate and outcome indicators the trends in the indicators are different for example access to finance and extension have risen over time fertilizer use irrigation development agriculture growth and adult undernourishment have fallen over time and child nutrition and poverty have remained stagnant over time different policy indicators are significantly associated with different indicators of agriculture intensification agriculture growth and outcomes also there are differences in the results across the agriculture transformation groups major policy drivers of agriculture transformation in the different groups are identified implications of the results and suggestions for future research are discussed

Report (United States. Department of Agriculture). 1802

research paper on agricultural production trends in the usa and ussr examines the decline in the soviet agricultural sector growing food imports and role of usa in food security discusses effects on bilateral economic relations graphs references statistical tables

Letters and Papers on Agriculture, Planting, &c., Selected from the Correspondence of the Bath and West of England Society for the Encouragement of Agriculture, Arts, Manufactures, and Commerce 1988

after 20 years the green revolution is generally referred to as a milestone in the international agricultural movement the introduction of new varieties of wheat and rice along with fertilizers pesticides and mechanized farm equipment has produced a dramatic increase in world food production this paper assesses the successes of the green revolution in light of its effect upon third world countries it cautions that the revolutionary gains in agricultural production have not been distributed evenly this uneven distribution of productivity is discussed in the first chapter productivity reconsidered the second chapter beyond the green revolution considers the need for new crop varieties and technologies including biotechnologies but argues that tomorrow s innovations must be more consistent with regional agricultural traditions this approach will help to avoid some of the environmental and social costs associated with the agricultural technologies utilized during the green revolution the third chapter rediscovering traditional agriculture examines the benefits and limitations of traditional methods of agriculture indicating that these practices should provide the basis for new practices rather than be swept aside as archaic toward appropriate biotechnology discusses some of the possible contributions offered by biotechnology as tools for more efficient and sustainable agriculture the document concludes with a call for additional research in sustainable agriculture productivity tw

Agriculture Et Développement 1963

excerpt from studies in the marketing of farm products the division of research in agricultural economics has devoted its energies largely to studies of marketing and farmers organizations the results of a statistical study of organizations have been published as agricultural experiment station bulletin no 146 entitled statistics of cooperation among farmers in minnesota the group of studies contained in the present publication represents primarily the results of research work that has been done in the general field of marketing the papers by messrs jesness warner and thompson were written under my supervision in the seminar in agricultural economics during the year 1913 1914 the paper by mr peterson was written as part of the work required in the general undergraduate course in agricultural economics mr jesness and mr warner were graduate students and mr thompson and mr peterson were seniors in the college of agriculture the paper by mr cavert was written under the supervision of professor c w thompson during the year 1912 1913 and the time of writing this report should be taken into consideration in reading it all of these men had their major work in other divisions of the college of agriculture and hence could not spend as much time on marketing investigations as a full treatment of their subjects would require all of the papers however represent original research work and although not by any means complete studies of the topics treated it is deemed that they contain enough new and valuable information in an important and neglected field to make their publication worth while the paper entitled market distribution was read before the american economic association at princeton n j in december 1914 and is published in the papers and proceedings of that association permission to reprint in this place is gratefully acknowledged by the university of minnesota and by the author about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
