5 Steps to Financial Independence 2019-12-03 a large percentage of us will only ever achieve financial independence when we reach state pension or social security age and retire unfortunately the age at which that occurs is now being gradually increased as life expectancies improve and public finances worsen some of us will be more fortunate than that we ll use our employer s pension and maybe the tax benefit of isa s to retire a few years early unfortunately the benefits of employer pensions are also being gradually eroded as defined benefit pensions go the way of the dodo and defined contribution schemes become the standard to make matters worse

globalisation and other factors are preventing earnings from increasing at any meaningful level combined this means our financial independence dates must get closer and closer to state pension or social security age which is getting later and later in our lifetimes depressingly some of us will also never make financial independence as we'll die while still working and others will make it because ill health will force us onto a life of benefits back in 2007 i decided that none of those routes were very attractive and went a different way a way that i have seen very few travel i built and executed on a plan that changed the way i thought about work how i lived and how i invested which enabled me to build a seven figure pound sum in less than 9 years enabling me to be early financially independent in my early 40s this book shares the tools and techniques behind that plan and then goes on to share how i physically applied them it covers both psychological and quantitative elements it covers saving investing and how to recognise when you have enough wealth amassed to mutter those liberating words i'm now financially independent

From Zero to Financial Independence in Less Than 10 Years 2020-01-19 the international bestseller new york public library's top 10 think thrifty reads of 2023 this book blew my mind more importantly it made financial independence seem achievable i read financial freedom three times cover to cover lifehacker money is unlimited time is not become financially independent as fast as possible in 2010 24 year old grant sabatier woke up to find he had 2.26 in his bank account five years later he had a net worth of over 1.25 million and cnbc began calling him the millennial millionaire by age 30 he had reached financial independence along the way he uncovered that most of the accepted wisdom about money work and retirement is either incorrect incomplete or so old school it's obsolete financial freedom is a step by step

path to make more money in less time so you have more time for the things you love it challenges the accepted narrative of spending decades working a traditional 9 to 5 job pinching pennies and finally earning the right to retirement at age 65 and instead offers readers an alternative forget everything you've ever learned about money so that you can actually live the life you want sabatier offers surprising counter intuitive advice on topics such as how to create profitable side hustles that you can turn into passive income streams or full time businesses save money without giving up what makes you happy negotiate more out of your employer than you thought possible travel the world for less live for free or better yet make money on your living situation create a simple money making portfolio that only needs minor adjustments think creatively there are so many ways to make money but we don't see them but most importantly sabatier highlights that while one's ability to make money is limitless one's time is not there's also a limit to how much you can save but not to how much money you can make no one should spend precious years working at a job they dislike or worrying about how to make ends meet perhaps the biggest surprise you need less money to retire at age 30 than you do at age 65 financial freedom is not merely a laundry list of advice to follow to get rich quick it's a practical roadmap to living life on one's own terms as soon as possible
