the virtual lab is an online simulation of a chemistry lab it is designed to help students link chemical computations with authentic laboratory chemistry the lab allows students to select from hundreds of standard reagents aqueous and manipulate them in a manner resembling a real lab

jun 3 2024 we are thrilled to announce that our latest research paper titled development of an mirfp680 based fluorescent calcium ion biosensor using end optimized transposons is now published in acs sensors congratulations to chai and all co authors the paper can be accessed here

2023-12-1 chemistry is a field that relies heavily on laboratory experimentation and the success of any experiment is largely dependent on the quality of the equipment being used from simple tools such as beakers and test tubes to more complex instruments such as spectrophotometers and chromatographs laboratory apparatuses

2023-5-21

proper use of balances for a chemical reaction to be successful reactants must be added with accurate specific masses and products must be accurately weighed at the end of the reaction therefore balances are
