the following is an account of my journeys throughout the world what started off as a couple of months to get away for an adventure turned into a ten year journey of learning enlightenment hard times and moments that will never leave me including times of joy sorrow love pain near death experiences and experiences nearly worth dying for during that time i travelled to over 60 countries set foot on every continent including antarctica worked in over half a dozen countries and saw relics from ancient civilisations and technological marvels of the modern world i saw the highest peak on earth the lowest valley and so much in between i visited places where they had never seen a white man before and countries ruled by governances ranging from democracies to theocracies to military regimes i saw the cruelty that humanity can have for each other as well as the love that can bind us all i fell in love had my heart broken a few times and broke a few hearts of my own carpe diem

wisdom literature asserts the author is grounded in the theological tradition of creation for the wisdom writers of israel and early judaism god is the maker of heaven and earth whose creativity both forms and sustains the world the very nature of god is to create life to sustain it and to ensure that it flourishes god s originating acts of creation and sustaining providence provide the basis for faith worship and ethics leo g perdue grounds his reconstruction of the theology of wisdom in the creation metaphors residing witin the language of the sages metaphors that derive from israelite creation traditions and the mythologies of the ancient near east he focuses on the differences and interactions between two sets of creation metaphors those dealing with the creation of the world cosmology and those centering on the creation of humankind anthropology the contemporary importance of the creation theology of wisdom literature says the author is that it can move the church away from one sided emphasis on salvation history and eschatology to a serious participation in environmental concerns and social justice wisdom and creation provides a thorough yet accessible discussion of the theological message of this important part of the bible

Wisdom & Creation

the all too frequent disregard of historical and social contexts by many wisdom scholars often leads to the distortion of this literature and transforms its teachings

into abstract ideas lacking any incarnation in the social and historical world of human living leo perdue here argues from a sociohistorical approach that the proper understanding of ancient wisdom literature requires one to move out of the realm of philosophical idealism into the flesh and blood of human history arguing that wisdom was international in practice and outlook perdue traces the interaction between both ruling and subject nations and their sages who produced their respective cultures and their foundational worldviews while not always easy to reconstruct he acknowledges the historical and social settings of texts provide necessary contexts for interpretation and engagement by later readers and hearers wisdom texts did not transcend their life settings to espouse values regardless of time and circumstance rather they are located in a variety of historical events in an evolving nation reflecting a vast array of different and changing moral systems epistemologies and religious understandings

atkinson uses qoheleth s work ethic to provide an analysis of ecclesiastes utilising the writings of st bonaventure and martin luther reading ecclesiastes within a penitential framework bonaventure offers a version of the contemptus mundi tradition that is rooted in his metaphysics his commentary is ethically significant for the way he detects the vice of curiosity precipitating a perceptual rupture wherein vanity comes to signify sin and guilt luther on the other hand interprets solomon as a wise economic political administrator who preaches the good news of god s involvement in quotidian existence this understanding enables luther to read ecclesiastes eschatologically with labour being seen as a locus of divine activity one may thus read solomon s refrain as an invitation to labour with the expectation of receiving god s gifts in the present finally atkinson suggests that ecclesiastes enhances current conversations regarding the theology and ethics of work by working the doctrinal foci of protology and eschatology through christology the presence of the word then can be found now only in the preaching and sacraments of the church but also in the labour of the worker

Using Ecological Models to Support and Shape Environmental Policy Decisions

2007-08-28

Environmental policy decisions are often made in a vacuum, without
consideration of the complex interactions between the environment and
society. This paper explores the use of ecological models to support and
shape environmental policy decisions. Ecological models are a type of
systems model that represent the interactions between different components
of an ecosystem. They can be used to understand the complex interactions
between the environment and society, and to identify the most effective
ways to address environmental problems. This paper discusses the use of
ecological models in environmental policy decisions, and provides a
framework for developing and using these models. The framework consists
of five steps: 1) identifying the problem, 2) defining the system, 3) developing
the model, 4) running the model, and 5) interpreting the results. The
paper also discusses the challenges of using ecological models in policy
decisions, and provides suggestions for overcoming these challenges. The
paper concludes by emphasizing the importance of using ecological models
to support and shape environmental policy decisions.
