**Super Power, Spooky Bards, and Silverware** 2017-09-01 how the super nintendo entertainment system embodied nintendo s s resistance to innovation and took the company from industry leadership to the margins of videogaming this is a book about the super nintendo entertainment system that is not celebratory or self congratulatory most other accounts declare the super nes the undisputed victor of the 16 bit console wars of 1989 1995 in this book dominic arsenault reminds us that although the snes was a strong platform filled with high quality games it was also the product of a short sighted corporate vision focused on maintaining nintendo s market share and business model this led the firm to fall from a dominant position during its golden age dubbed by arsenault the renaissance with the nes to the margins of the industry with the nintendo 64 and gamecube consoles arsenault argues that nintendo s conservative business strategies and resistance to innovation during the snes years explain its market defeat by sony s playstation extending the notion of platform to include the marketing forces that shape and constrain creative work arsenault draws not only on game studies and histories but on game magazines boxes manuals and advertisements to identify the technological discourses and business models that formed nintendo s super power he also describes the cultural changes in video games during the 1990s that slowly eroded the love of gamer enthusiasts for the snes as the nintendo generation matured finally he chronicles the many technological changes that occurred through the snes s lifetime including full motion video cd rom storage and the shift to 3d graphics because of the snes platform s architecture arsenault explains nintendo resisted these changes and continued to focus on traditional gameplay genres

**Super Powers of Mass Destruction** 2016-12-20 america will remain the world s only superpower for the foreseeable future but what sort of superpower what role should america play in the world what role do you want america to play ian bremmer argues that washington s directionless foreign policy has become prohibitively expensive and increasingly dangerous since the end of the cold war u s policymakers have stumbled from crisis to crisis in afghanistan iraq iran libya syria and ukraine without a clear strategy ordinary americans too often base their foreign policy choices on allegiance or opposition to the party in power we can no longer afford this complacency especially now that both parties are deeply divided about america s role in the world the next presidential election could easily pit an interventionist democrat against an isolationist republican or the exact opposite as 2016 rapidly approaches bremmer urges every american to think more deeply about what sort of country america should be and how it should use its superpower status he explores three options independent america asserts that it s time for america to declare independence from the responsibility to solve other people s problems instead americans should lead by example in part by investing in the country s vast untapped potential moneyball america acknowledges that washington can t meet every international challenge with a clear eyed assessment of u s strengths and limitations we must look beyond empty arguments over exceptionalism and american values the priorities must be to focus on opportunities and to defend u s interests where they re threatened indispensable america argues that only america can defend the values on which global stability increasingly depends in today s interdependent hyperconnected world a turn inward would undermine america s own security and prosperity we will never live in a stable world while others are denied their most basic freedoms from china to russia to the middle east and

beyond there are sound arguments for and against each of these choices but we must choose washington can no longer improvise a foreign policy without a lasting commitment to a coherent strategy as bremmer notes when i began writing this book i didn't know which of these three choices i would favor it's easy to be swayed by pundits and politicians with a story to sell or an axe to grind my attempt to make the most honest and forceful case i could make for each of these three arguments helped me understand what i believe and why i believe it i hope it will do the same for you i don't ask you to agree with me i ask only that you choose
