#### Nikkei torendi 1992

this is the second of a two volume series of books about fluoroplastics volume 1 covers the non melt processible homopolymers requiring non traditional processing techniques volume 2 is devoted to the melt processible fluoropolymers their polymerization and fabrication techniques including injection molding wire tube and film extrusion rotational molding blow molding compression molding and transfer molding both a source of data and a reference the properties characteristics applications safety disposal and recycling of melt processible fluoropolymers are comprehensively detailed for immediate use by today s practicing engineering and scientists in the plastics industry students will benefit from the book s arrangement and extensive references
