Planning Support Tools: Policy Analysis, Implementation and Evaluation. Proceedings of the Seventh International Conference on Informatics and Urban and Regional Planning INPUT2012 2012-06-13T00:00:00+02:00 this study recovers italo calvino s central place in a lost history of interdisciplinary thought politics and literary philosophy in the 1960s drawing on his letters essays critical reviews and fiction as well as a wide range of works primarily urban planning and design theory and history circulating among his primary interlocutors this book takes as its point of departure a sweeping reinterpretation of invisible cities passages from calvino s most famous novel routinely appear as aphorisms in calendars posters and the popular literature of inspiration and self help reducing the novel to vague abstractions and totalizing wisdom about thinking outside the box the shadow of postmodern studies has had a similarly diminishing effect on this text rendering up an accomplished but ultimately apolitical novelistic experimentation in endless deconstructive deferrals the shiny surfaces of play and the ultimately rigged game of self referentiality in contrast this study draws on an archive of untranslated italian and french language materials on urban planning architecture and utopian architecture to argue that calvino s novel in fact introduces readers to the material history of urban renewal in italy france and the u s in the 1960s as well as the multidisciplinary core of cultural life in that decade the complex and continuous interplay among novelists and architects scientists and artists literary historians and visual studies scholars his last love poem for the dying city was in fact profoundly engaged deeply committed to the ethical dimensions of both architecture and lived experience in the spaces of modernity as well as the resistant practices of reading and utopian imagining that his urban studies in turn inspired

Dizionario della lingua italiana 1869 this volume addresses textbooks written in the albanian language and in use in albania kosovo macedonia and serbia political myths and mythical spaces play a key role in shaping processes of identity building concepts of self and other and ideas pertaining to the location of the self and nation within a post conflict context the albanian case is particularly interesting because the majority of albanians live outside the borders of albania despite the existence of the nation state which gives rise to fascinating complexities regarding the shaping of national identities and myths surrounding concepts of self and other what textbooks teach is always of political interest as they represent society s intentions for its next generation this renders identity building processes via textbooks in this context a particularly fascinating topic for research here examined through the lens of myths and mythical spaces

Italo Calvino's Architecture of Lightness 2017-12-04 this book explores the topic of proximity and its relations in the design of contemporary urban fabrics and public spaces the effects of the covid 19 pandemic and reflections on the future of cities have lately shed light on the concept of proximity which is intended as the relationship between communities and urban functions and as relations among people built spaces and open spaces the proximity is a historic and fertile field of interest for american and northern european urban studies it is a spatial and social program seemingly surpassed by the styles and rhythms of contemporary city life but today it is back in vogue with different purposes meanwhile the action research developed by the department of architecture and urban studies at the politecnico di milano for the municipality of milan reached its conclusion 2018 2020 the research work focused on contextualizing the new m4 metro line stations under construction and jointed mobility flows and places long range networks and local ones boosting the idea of metro stations as regenerative urban thresholds and urban platforms for enabling environmental sustainable settlement and active mobility systems in other words the action research for milan shows how to achieve the concept of proximity in the urban design practice in a dense stratified and complex urban context

Myths and Mythical Spaces 2022-12-15 why should we wonder about man and the human sense what are the questions and answers we are seeking why should we read the work of werner sombart or rather why should we re read this sombart this book tracks the human sense in order to rediscover this compass against the current crisis of the humanistic conception of society this crisis is manifest in a repositioning of society which is no longer human by definition in contrast to the past when the term human society was a tautology and redundant as such the human element of society must be rediscovered this book revitalizes the scientific sense of the human which is almost anesthetized often frustrated and belittled sometimes confused and mistaken with something else frequently misunderstood and made unrecognizable but precisely for this reason which is increasingly essential today
