The Delusions of Crowds

2021-05-06

inspired by charles mackay s 19th century classic memoirs of extraordinary popular delusions and the madness of crowds william bernstein engages with mass delusion with the same curiosity and passion but armed with the latest scientific research that explains the biological evolutionary and psychosocial roots of human irrationality bernstein tells the stories of dramatic religious and financial mania in western society over the last 500 years from the anabaptist madness that afflicted the low countries in the 1530s to the dangerous end times beliefs that animate isis and pervade today s polarised nations and from the south sea bubble to the enron scandal and dot com bubbles of recent years through bernstein s supple prose the participants are as colourful as their motivation invariably the desire to improve one s well being in this life or the next as revealing about human nature as they are historically significant bernstein s chronicles reveal the huge cost and alarming implications of mass mania as he observes that if we can absorb the history and biology of mass delusion we can recognise it more readily in our own time and avoid its frequently dire impact

think about life but all will open your eyes to the false beliefs we have held to be true but which in fact are false and need to be dissolved if we re ever to rise into the light of our divine heritage there is no god you only live once the 13 is evil it s just sex ghosts aren t real there is only one savior we can change the world life is unfair and unjust we have total free will everyone has a soul mate i m a victim it s your fault opposites attract there can be peace on earth

27 Delusions of Mankind

2021-08-31

we all think that we can tell the difference between someone who is mad or whom psychiatrists call psychotic and someone who is sane but can we really tell who is mad and who is not do we really know what madness is and how it should be recognized have psychiatrists made a sensible distinction between the patient who believes that aliens are beaming messages to him from a foreign planet and the religious fanatic who believes god communicates to him via automatic writing is there a difference between the paranoid patient who believes that the fbi is after him and the sizeable proportion of our normal population that believe that the us government orchestrated the 9 11 bombings here reznek hopes to shed light on the delusions of the masses those delusions that are common to everyday people living so called ordinary lives he provides an understanding of madness and the psychological processes that drive us to adopt delusions arguing that it is a mistake to view only schizophrenic patients as delusional while excluding large groups of society from such an analysis if we abandon the idea that whole communities cannot share a delusion we can come to a better understanding about why the world is such a dangerous place

Delusions and the Madness of the Masses

fantasy is the plant our mind waters everyday we all have fantasies that we hide from the world fantasies that we hold close to our hearts fantasies that make us glee and fantasies that give us hope fantasy is subjective but universal it is a feeling that is easy to imagine but difficult to exposit a feeling so ecstatic that it either blocks the mind or lets all emotions flow beautiful and sometimes it is nothing but our heart's delusion delusions of my heart is the coming together of various writers to pour out onto paper the fantasies of their hearts it is a collection of poems quotes and stories that bring forth delusional emotions written by 25 talented authors and compiled by saloni the book is sure to take you on a fantasy roller coaster

Delusions of my heart

2013-05-28

one of our most brilliant social critics author of the bestselling the middle mind presents a scathing critique of the delusions of science alongside a rousing defense of the tradition of romanticism and the big questions with the rise of religion critics such as richard dawkins and of pseudo science advocates such as malcolm gladwell and jonah lehrer you re likely to become a subject of ridicule if you wonder why is there something instead of nothing or what is our purpose on earth instead at universities around the world and in the general cultural milieu we re all being taught that science can resolve all questions without the help of philosophy politics or the humanities in short the rich philosophical debates of the 19th century have been nearly totally abandoned argues critic curtis white an atheist himself white nonetheless calls this new turn scientism and fears what it will do to our culture if allowed to flourish without challenge in fact in scientism white sees a new religion with many unexamined assumptions in this brilliant multi part critique he aims at a ted talk by a distinguished neuroscientist in which we are told that human thought is merely the product of our connectome a map of neural connections in the brain that is yet to be fully understood he whips a widely respected physicist who argues that our new understanding of the origins of the universe obviates any philosophical inquiry and ends with a learned defense of the tradition of romanticism which white believes our technology and science obsessed world desperately needs to rediscover it s the only way he argues that we can see our world clearly and change it

The Science Delusion

2020-12-19

is our perception of the world a delusion ale will find have to find out just how much of a delusion her life has been she believes no man or woman should have the power to control dreams and she is determined to stop the force entity or person behind her extremely vivid and detailed dreams and stop the grand scheme that has ruined her friendships family and sanity today it may seem completely absurd but when night falls the power behind the ideas and the conviction of the images in her dreams are so vigorous that it leaves ale no choice but to step up and find answers but when the world turns on your sanity you yourself start to believe you are unhinged and so her battle to distinguish reality and fiction begins a crippling yet captivating story of grief catastrophe and brain functioning and power follow ale through the storms of healthcare facilities loss and new age political deviance that will cost ale more than just her sanity an adventure that transcends oceans and realms of existence that will have you questioning your own reality

in the delusions of economics gilbert rist presents a radical critique of neoclassical economics from a social and historical perspective rather than enter into existing debates between different orthodoxies rist instead explores the circumstances that prevailed when economics was invented and the resultant biases that helped forge the construction of economics as a science in doing so rist demonstrates how these various presuppositions are either obsolete or just plain wrong and that traditional economics is largely based on irrational convictions that are difficult to debunk due to their religious nature as a result we are prevented from properly understanding the world around us and dealing with the financial environmental and climatic crises that lie ahead provocative and original this essential book provides incontrovertible proof that the construction of a new economic paradigm pluralistic ecologically compatible grounded in reality has now become a necessity

for a long time now especially since darwin science has been ruled by the philosophy of materialism which holds that life and mind are simply accidents of matter and that to argue otherwise is just wishful thinking some scientists write books with titles like the god delusion promoting this view of existence at the same time we now know as darwin did not that living cells are like micro miniaturized factories of stunning dna coded complexity where all life is sustained 24 7 by astonishingly complex processes at supercomputer speeds it is also now known that a single human brain has more molecular scale switches than all the computers routers and internet connections on the entire planet today increasing numbers scientists and thinkers are skeptical that life and mind can be reduced to matter and that random events are responsible for such amazingly clever bio functioning this is why in conflict with the darwinian view of evolution they suggest that the living world does not look like a 24 7 accident because it really genuinely isn t one paralleling these discoveries modern research into psychic phenomena out of body and near death experiences has begun to show that human consciousness is transdimensional it can exist apart from the body and amazingly that the personality does after all survive the death of the body it is science today as much as religion that is starting to confirm collective humanity s perennial intuition that life is not only magical but also intelligent and meaningful we join two friends oliver and alisha as they discuss these

Delusions of Grandma

1994

2023-05-30

karl jommers is a straight shooting therapist committed to helping blue collar men overcome their reluctance to seek counseling a mission instilled in him after the suicide of his steelworker father after a cop is set up to be shot jommers must evaluate the two police officers involved they both offer conflicting accounts but neither is lying their divergent perspectives are blurred by their personal anxieties and politics where one sees acts of local corruption the other envisions a government conspiracy that includes covert dispersion of anxiogenic chemicals jommers methodically tries to disentangle the discordance but is faced with a quandary he can't square his patients differing views without first discerning the truth of what happened but stepping outside his domain to investigate may jeopardize his faltering practice and possibly his life as he labors to clear the angst fogged lenses of others he is forced to question the clarity of his own perception

Delusions

2019-11-21

in delusions of grandeur joey franklin examines the dreams and delusions of america's most persistent mythologies including the beliefs in white supremacy and rugged individualism and the problems of toxic masculinity and religious extremism as they reveal themselves in the life of a husband and father fast approaching forty with prose steeped in research and a playful lyric attention to language franklin asks candid questions about what it takes to see clearly as a citizen a parent a child a neighbor and a human being how should a white father from the suburbs talk with his sons about the death of trayvon martin what do video games like fortnite and minecraft reveal about our appetites for destruction is it possible for americans to celebrate bootstrap pioneer history while also lamenting the slavery that made it possible how does the american tradition of exploiting cheap labor create a link between coal mining and plasma donation in southeast ohio part cultural critique part parental confessional delusions of grandeur embraces the notion that the personal is always political and reveals important if sometimes uncomfortable truths about our american obsessions with race class religion and family

Delusions of Clarity

2020-10
