the spread of industrialism the emergence of professionalism the challenge to slavery these and other developments fueled an anxious debate about work in antebellum america in this book nicholas k bromell discusses the ways in which american writers participated in this cultural contestation of the nature and meaning of work in chapters on thoreau melville hawthorne rebecca harding davis susan warner harriet beecher stowe and frederick douglass bromell shows how these writers not only scrutinized work be it factory labor agriculture maternal labor or slave labor but also reflected upon its relation to their own work of writing bromell argues that american writers generally sensed a deep affinity between the mental labor of writing and such bodily labors as blacksmithing house building housework mothering field labor growing beans and so on nevertheless writers resisted identifying their labor as purely or simply bodily both because society placed mental and spiritual labor at the top of its scale of values and because the body was so often the site of gender or racial subjugation bromell also makes important contributions to three areas of nineteenth century social history he probes the period s conflicting ideas of mothers as both spiritual angels of the house and ineluctably embodied laborers in the

home using as an example the exhibitions of the massachusetts charitable mechanic association he discusses the advent of an industrial ideology that sought to devalue the meaning of skilled manual labor finally he suggests that paradoxically slaves were sometimes able to find in their labor a mode of self actualization within slavery deftly combining literary and social history canonical and noncanonical texts primary source material and contemporary theory by the sweat of the brow establishes work as an important subject of cultural criticism at the same time it contributes to discussions of race gender and the body in american literary studies

Writing for Immortality 2010-01-01

before the civil war american writers such as catharine maria sedgwick and harriet beecher stowe had established authorship as a respectable profession for women but though they had written some of the most popular and influential novels of the century they accepted the taboo against female writers regarding themselves as educators and businesswomen during and after the civil war some women writers began to challenge this view seeing themselves as artists writing for themselves and for posterity writing for immortality studies the lives and works of four prominent members of the first generation of american women who strived for recognition as serious literary artists louisa may alcott elizabeth stuart Phelps elizabeth stoddard and Constance Fenimore Woolson combining literary criticism and cultural history anne e boyd examines how these authors negotiated the masculine connotation of artist imagining a space for themselves in the literary pantheon redrawing the boundaries between male and female literary spheres and between american and british literary traditions boyd shows how these writers rejected

the didacticism of the previous generation of women writers and instead drew their inspiration from the most prominent literary writers of their day emerson james barrett brownning and eliot placing the works and experiences of alcott phelps stoddard and woolson within contemporary discussions about genius and the american artist boyd reaches a sobering conclusion although these women were encouraged by the democratic ideals implicit in such concepts they were equally discouraged by lingering prejudices about their applicability to women

in response to the resurgence of interest in american novelist poet short story writer and newspaper correspondent elizabeth stoddard 1823 1902 whose best known work is the morgesons 1862 jennifer putzi and elizabeth stockton spent years locating reading and sorting through more than 700 letters scattered across eighteen different archives finally choosing eighty four letters to annotate and include in this collection by presenting

complete annotated transcripts the selected letters provides a fascinating introduction to this compelling writer while at the same time complicating earlier representations of her as either a literary handmaiden to her at the time more famous husband the poet richard henry stoddard or worse as the pythoress whose difficult personality made her a fickle and unreasonable friend the stoddards belonged to new york s vibrant close knit literary and artistic circles among their correspondents were both family members and friends including writers and editors such as julia caroline ripley dorr rufus griswold james russell lowell caroline healey dall julian hawthorne william dean howells helen hunt jackson edmund clarence stedman and margaret sweat an innovative and unique writer stoddard eschewed the popular sentimentality of her time even while exploring the emotional territory of relations between the sexes her writing in both her published fiction and her personal letters is surprisingly modern and psychologically dense the letters are highly readable lively and revealing even to readers who know little of her literary output or her life as scholars of epistolarity have recently argued letters provide more than just a biographical narrative they also should be understood as aesthetic performances themselves the correspondence provides a sense of stoddard as someone who understood letter writing as a distinct and important literary genre making this collection particularly well suited for new conceptualizations of the epistolary genre
