in an era of information overload our need to learn how to critically evaluate the growing flood of information has never been greater critical reflection showcases the role of reason in a world saturated by media enhanced persuasion and complex scientific and technological jargon drawing from the classic philosophical texts this engaging textbook on the art of analyzing arguments is also relevant to today's undergraduates in its use of real life examples and exercises drawn mainly from media and politics malcolm murray and nebojsa kujundzic cover the standard subjects in a one semester course on critical thinking offering ways to analyze arguments in the following areas language use acceptability conditions for truth categorical and propositional logic induction causal claims probability reasoning analogical reasoning an in depth analysis of informal fallacies critical reflection further distinguishes itself with in depth answers to chapter exercises that are incorporated directly into the authors detailed discussions this is an ideal textbook to help professors foster autonomous thinking among their students now in paperback the second edition of the oxford textbook of critical care is a comprehensive multi disciplinary text covering all aspects of adult intensive care management uniquely this text takes a problem orientated approach providing a key resource for daily clinical issues in the intensive care unit the text is organized into short topics allowing readers to rapidly access authoritative information on specific clinical problems each topic refers to basic physiological principles and provides up to date treatment advice supported by references to the most vital literature where international differences exist in clinical practice authors cover alternative views key messages summarise each topic in order to aid quick review and decision making edited and written by an international group of recognized experts from many disciplines the second edition of the oxford textbook of critical care provides an up to date reference that is relevant for intensive care units and emergency departments globally this volume is the definitive text for all health care providers including physicians nurses respiratory therapists and other allied health professionals who take care of critically ill patients in an era when corporate and political leaders are using their power to control every aspect of the schooling process in north america there has been surprisingly little research on the impact of textbook content on students the contributors of this volume and its partner the new politics of the textbook problematizing the portrayal of marginalized groups in textbooks guide educators school administrators academics and other concerned citizens to unpack the political social and cultural influences inherent in the textbooks of core content areas such as math science english and social science they urge readers to reconsider the role textbooks play in the creation of students political social and moral development and in perpetuating asymmetrical social and economic relationships where social actors are bestowed unearned privileges and entitlements based upon their race gender sexuality class religion and linguistic background finally they suggest ways to resist the hegemony of those texts through critical analyses critical questioning and critical pedagogies making up your mind is oriented toward the writing of arguments it gives students techniques that they can use to better understand organize and present their own thoughts the book provides an exceptionally clear statement of what critical thinking adds to the study of logic along with complete and systematic coverage of all crucial logical operators and major logical relations it also offers exceptionally clear and informative discussions of the definition of argument the distinction between induction and deduction and the role of emotion in argument the second half of the book presents an argument outline which students can use to organize virtually any ethical argument this outline is also used to illustrate the most important informal fallacies and how they can be avoided in its closing chapters the book discusses the nature of good evidence and good sources of evidence and their role in argument included are discussions of scientific method the logical form of arguments about causal theories and arguments from analogy the online version of the radical revision to this leading critical care text oxford textbook of critical care is a single volume major reference book covering adult critical care medicine the book includes two colour diagrams and illustrations to aid clarity there is also a cd rom version with additional graphics the major goal of this book is to provide an up to date reference that would be relevant throughout the world in a format that allows rapid access to clinically important information authorship has been drawn from recognized experts throughout the world so that it will compete in the international market and gain acceptance as a major reference the major difference between the oxford textbook of critical care and its competitors is the problem oriented format of the clinical sections providing a reference source related to the problems faced in everyday critical care medicine rather than using the classical chapter layout the text has been organized into short topics which will allow readers to focus their reading on particular clinical problems clinical topics are covered with reference to the basic physiological principles underlying critical care medicine where international differences exist authors cover alternative views drawing on the work of leading economists this title lays bare the blind spots in the texts and their sins of omission and commission it shows where hidden value judgements are made and when contrary evidence is ignored it also shows the claims made without any evidence and the alternative theories that aren't mentioned mainstream textbooks present economics as an objective science free from value judgements the microeconomics anti textbook demonstrates this to be a myth one which serves to make such textbooks not only off puttingly bland but also dangerously misleading in their justification of the status quo and neglect of alternatives in this fully updated and expanded edition of their celebrated book professors rod hill and tony myatt lay out the essentials of each topic in the standard texts in a clear and concise way before presenting an anti text analysis and critique challenging the assumptions arguments and models hill and myatt provide the essential guide to decoding the textbooks and show that real economics is far more interesting and subversive than the simplistic version presented to students current issues and enduring questions is a text and reader that
