The World Almanac and Book of Facts *1942*

to be a storyteller is an incredible position from which to influence hearts and minds and each one of us has the capacity to utilise storytelling for a sustainable future this book offers unique and powerful insights into how stories and storytelling can be

utilised within higher education to support sustainability literacy stories can shape our perspective of the world around us and how we interact with it and this is where storytelling becomes a useful tool for facilitating understanding of sustainability concepts which tend to be complex and multifaceted the craft of storytelling is as old as time and has influenced human experience throughout the ages the conscious use of storytelling in higher education is likewise not new although less prevalent in certain academic disciplines what this book offers is the opportunity to delve into the concept of storytelling as an educational tool regardless of and beyond the boundaries of subject area written by academics and storytellers the book is based on the authors own experiences of using stories within teaching from a story of the ecology of law to the exploration of sustainability in accounting and finance via contemporary cinema practical advice in each chapter ensures that ideas may be put into practice with ease in addition to examples from the classroom the book also explores wider uses of storytelling for communication and sense making and ways of assessing student storytelling work it also offers fascinating research insights for example in addressing the question of whether positive utopian stories relating to climate change will have a stronger impact on changing the behaviour of readers than will dystopian stories everyone working as an educator should find some inspiration here for their own practice on using storytelling and stories to co design positive futures together with our students

Sourcebook of Family Theories and Methodologies 2022-11-07

technology and culture provides a comprehensive overview of anthropological and other theories examining the place of technology in culture and the consequences of technology for cultural evolution the book develops and contrasts anthropological discourse of technology and culture with humanistic and managerial views it uses core anthropological concepts including adaptation evolution totemic identity and collective representations to locate a broad variety of technologies ancient and modern in a context of shared understandings and misunderstandings the author draws on his own experience as an auto mechanic computer programmer ethnographer and aircraft pilot to demonstrate that technologies are cultural creations encoding and accelerating the dreams and delusions of the societies that produce them

Educational Horizons 1958

the field of marketing and management has undergone immense changes over the past decade these dynamic changes are driving an increasing need for data analysis using quantitative modelling problem solving using the quantitative approach and other models has always been a hot topic in the fields of marketing and management quantitative modelling seems admirably suited to help managers in their strategic decision making on operations management issues in social sciences quantitative research refers to the systematic empirical investigation of social phenomena via statistical mathematical or computational techniques the first edition of quantitative modelling in marketing and management focused on the description and applications

of many quantitative modelling approaches applied to marketing and management the topics ranged from fuzzy logic and logical discriminant models to growth models and k clique models the second edition follows the thread of the first one by covering a myriad of techniques and applications in the areas of statistical computer mathematical as well as other novel nomothetic methods it greatly reinforces the areas of computer mathematical and other modeling tools that are designed to bring a level of awareness and knowledge among academics and researchers in marketing and management so that there is an increase in the application of these new approaches that will be embedded in future scholarly output
