1999

profiling 5 261 active dealers the new edition of this unique reference tool gives key facts about dealers in used and antiquarian books as well as specialty dealers who cover subjects in depth each entry not only provides name address phone fax e mail and other basic information but also gives up to 16 additional details if reported by dealers including size and composition of stock discounts to the trade electronic search networks used catalogs issued services provided professional memberships etc three detailed indexes subject index store name index and owner and manager index provide easy access to all information in the main entries

The Azure Cloud Native Architecture Mapbook

2021-02-17

this is your essential one stop shop for information on starting and running a practice case studies and advice from practitioners big and small run alongside outlines of all the key topics to give you an insight into the problems and challenges others have faced when setting up a design business accessible and informative this handbook is the ideal first point of reference when starting a practice architects have many different reasons for setting up in practice equally there are many ways of running your own business this handbook helps you consider whether or not you should set up on your own examining issues such as financing office space recruitment it and workingo ut a business plan some architects want to stay small while others have ambitions to grow into large businesses some grow big accidentally and then there are those who pick and choose their work carefully and even turn down undesirable contracts while others will grab at everything possible this book woudl explore these different models and illustrate how different kinds of practice develop into successful businesses importantly the book will stress that these issues are crucial you may be the best designer in the world but unless your business is well managed you will fail on the other hand some successful architects spend a lot of time looking for new work and attending to

management issues rarely finding the time for design work this book would illustrate how architects have struck a balance between these two extremes

Hospital Reference Architecture Guide: The Complete and Expanded English Translation of the Dutch Zira

2024-02-05

guide to london s contemporary architecture provides a guide to the wealth of architecture completed in london the book first offers information on the buildings located in the city of london and the docklands these include the broadgate complex alban gate bracken house whitechapel art gallery queen street offices girozentrale vienna minster court billingsgate securities market canary wharf financial times printing works isle of dogs neighborhood center reuters technical services centre and the david mellor building the publication examines the structures found in the east end west end and north london discussions focus on sainsbury wing national gallery sackler gallery queen elizabeth ii conference center richmond house clore gallery lauriston studios leyton fire station lisson bell street galleries lisson grove offices and flats sainsbury supermarket and housing crowndale centre nightingale house and the bisterne avenue apartments the text takes a look at the edifices located in west london including richmond riverside sterling hilton hotel thames wharf studios st mary s church barnes metropolis studios and the fowler jestico house the publication is a dependable reference for architects and design engineers interested in the architecture of london

Reference Guide

2005-01-01

this important reference from the american institute of architects provides architects and other design professionals with the guidance they need to plan for security in both new and existing facilities security is one of the many design considerations that architects must address and in the wake of the september 11th 2001 events it has gained a great deal of attention this book emphasises basic concepts and provides the architect with enough information to conduct an assessment of client needs as well as work with consultants who specialise in implementing security measures included are chapters on defining security needs understanding threats blast mitigation building systems facility operations and biochemical protection important reference on a design consideration that is growing in importance provides architects with the fundamental knowledge they need to work with clients and with security consultants includes guidelines for conducting client security assessments best practices section shows how security can be integrated into design solutions contributors to the book represent an impressive body of knowledge and specialise in areas such as crime prevention blast mitigation and biological protection
