jung s correspondence with one of the twentieth century s leading theologians and ecumenicists on theology and psychology brings together c g jung s correspondence with adolf keller a celebrated protestant theologian who was one of the pioneers of the modern ecumenical movement and one of the first religious leaders to become interested in analytical psychology their relationship spanned half a century and for many years keller was the only major religious leader to align himself with jung and his ideas both men shared a lifelong engagement with questions of faith and each grappled with god in his own distinctive way presented here in english for the first time are letters that provide a rare look at jung in dialogue with a theologian spanning some fifty years these letters reveal an extended intellectual and spiritual discourse between two very different men as they exchange views on the nature of the divine the compatibility of jungian psychology and christianity the interpretation of the bible and figures such as jesus and job and the phenomenon of national socialism although keller was powerfully attracted to jung s ideas his correspondence with the famed psychiatrist demonstrates that he avoided discipleship both men struggled with essential questions about human existence spirituality and well being and both sought common ground where the concerns of psychologists and theologians converge featuring an illuminating introduction by marianne jehle wildberger on theology and psychology offers incomparable insights into the development of jung s views on theology and religion and a unique window into a spiritual and intellectual friendship unlike any other

the legal position of convicted offenders is complex as are the social consequences that can result from a criminal conviction after they have served their sentences custodial or not convicted offenders often continue to be subject to numerous restrictions in many cases indefinitely due to their criminal conviction in short

criminal convictions can have adverse legal consequences that may affect convicted offenders in several aspects of their lives in turn these legal consequences can have broader social consequences legal consequences are often not formally part of the criminal law but are regulated by different areas of law such as administrative law constitutional law labour law civil law and immigration law for this reason they are often obscured from judges as well as from defendants and their legal representatives in the courtroom the breadth severity and longevity and often hidden nature of these restrictions raises the question of whether offenders fundamental rights are sufficiently protected this book explores the nature and extent of the legal consequences of criminal convictions in europe australia and the usa it addresses the following questions what legal consequences can a criminal conviction have how do these consequences affect convicted offenders and how can and should these consequences be limited by law
