formal research ethics committees in Canada now function as an industry costing over thirty five million dollars annually the

seduction of ethics argues that while ethics codes are alluring to the public they fuel moral panic and increase demands for institutional accountability will c van den hoonard explores the research ethics review process itself by analysing the moral cosmology and practices of ethics committees regarding research and researchers the seduction of ethics also investigates how researchers have tailored their approaches in response to technical demands leading social science disciplines to resemble each other more closely and lose the richness of their research van den hoonard reveals an idiosyncratic and inconsistent world in which researchers employ particular strategies of avoidance or partial or full compliance as they seek approval from ethics committees

judaism openly recognizes as an integral part of human nature the enigmatic relationship between yetzer or physical desire and yetzirah or spiritual creativity creativity and sexuality written as a fictional dialogue clearly delineates the psychic interdependence of these two drives as well as the integration of the concepts as they are defined by both jewish mysticism and modern psychology mordechai rotenberg is interested in the impact of religion on the psychology of everyday life he was prompted to write creativity and sexuality by the popularity of writings that explore jewish texts on the subject of sexuality from a historical or literary point of view but that do not hesitate to include psychological evaluations based on popular secondary psychological concepts this work seeks to provide an accurate psychological analysis of sexuality and spirituality from a jewish mystical perspective as such it both reconstructs the interdisciplinary bridge between judaism and psychology and deconstructs some exegetical traditions the goal is to present new paradigmatic options which may help modern society struggle more efficiently with its sexuality ultimately the author sees physical desire and spiritual creativity as a regulative continuum people learn how to spend the tremendous power of energy that the sexual yetzer produces not only on physical sex but on the spiritual yetzirah in an introduction written especially for this new edition the author explains the continuing relevance of creativity and sexuality and the ongoing relationship between sexual desire and a healthy spiritual self fulfillment this volume will be of interest to students of judaism psychology mysticism and sexuality

the different psychopathologic syndromes show in an exaggerated and caricatural manner the basic structures of human existence these structures not only characterize psychopathology but they also determine the highest forms of culture this is the credo of freud s anthropology this anthropology implies that humans are beings of the in between the human being is essentially tied up between pathology and culture and normativity cannot be defined in a theoretically convincing manner the authors of this book call this freudian anthropology a patho analysis of existence or a clinical anthropology this anthropology gives a new meaning to the nietzschean dictum that the human being is a sick animal freud and later lacan first developed this anthropological insight in relation to hysteria in its relation to literature this patho analytic perspective progressively disappears in freud s texts after 1905 this book reveals the crucial moments of that development in doing so it shows clearly not only that freud introduced the oedipus complex much later than is usually assumed but also that the theory of the oedipus complex is irreconcilable with the project of a clinical anthropology the authors not only examine the philosophical meaning of this thesis in the work of freud they also examine its avatars in the texts of jacques lacan and show how this project of a patho analysis of existence inevitably obliges us to formulate a non oedipal psychoanalytic anthropology

Sigmund Freud's Christian Unconscious 1993

first published in 1969 this was a new assessment of freud s most creative years and the formative period in psychoanalysis and was the first book to attempt a systematic presentation of freud s early ideas relating them to his later work and to contemporary psychoanalysis during the years 1888 1898 freud published 15 papers and one book in addition many of his ideas were formulated in a series of letters and drafts that he wrote to dr wilhelm fliess this material provided new insights into the nature of freud s creative genius and gave new meaning to his published works psychoanalysis the first ten years reviews these early papers drafts and letters and describes tentative formulations that in spite of their value were not developed further because of lack of time or a shift in interest as dr stewart observes the study of this aspect of freud s work is perhaps the most exciting freud s creativity in these years was remarkable the ideas he discarded in this short period of time would for a less gifted person have been a full life s work of which he could have been proud there is a good deal of historical and literary interest in his account of freud s relationships with fliess breuer and others but the core of the book is the critical assessment and systematic presentation of freud s early major insights which dramatically reveal a creative genius in the process of discovery

the immensely influential work of jacques lacan challenges readers both for the difficulty of its style and for the wide range of intellectual references that frame its innovations lacan s work is challenging too for the way it recentres psychoanalysis on one of the most controversial points of freud s theory the concept of a self destructive drive or death instinct originally published in 1991 death and desire presents in lacanian terms a new integration of psychoanalytic theory in which the battery of key freudian concepts from the dynamics of the oedipus complex to the topography of ego id and superego are seen to intersect in freud s most far reaching and speculative formulation of a drive toward death boothby argues that lacan repositioned the theme of death in psychoanalysis in relation to freud s main concern the nature and fate of desire in doing so lacan rediscovered freud s essential insights in a manner so nuanced and penetrating that prevailing assessments of the death instinct may well have to be re examined although the death instinct is usually regarded as the most obscure concept in freud s metapsychology and lacan to be the most perplexing psychoanalytic theorist richard boothby s straightforward style makes both accessible he illustrates the coherence of lacanian thought and shows how lacan s work comprises a return to freud along new and different angles of approach written with an eye to the conceptual structure of psychoanalytic theory death and desire will appeal to psychoanalysts and philosophers alike
